

Library Renovation

By: Chat, Keito, Leon

Current Library

- The walk ways are really narrow
- Very packed making the library look narrow
- Not a comfortable place for people to read
- Does not attract people
- The light is not bright
 - Makes the library not inviting
- Not in a very good condition (old)
- According to students it looks more like an office than a library

Entrance

Small sofa area

Future LIBRARY

- Increase the size of the library walkway
- Appealing to younger community
 - More colorful and more inviting
- Nature themed
 - Nature is a relaxing place
- Spacious
 - Expanded to the storage room
- Functional spaces
 - Bean bag areas and study table
- Live plants
- The collum outside of the library would be turned into a bookshelf tree.

Tree bookshelf

REASONS BEHIND

- We believe that by the library becoming more spacious it would welcome more people so they can spend their time there
- Nature can makes it look more appealing to that kid and it could make the atmosphere more relaxing
- The current library is very cramped and not as inviting. People think that they should organize it so that there would be more space for people to walk.
- We added live plants in the room to make it more aesthetic and hope to encourage kids to appreciate nature
- We wanted to use the outside space as well so we made extra bookshelves outside

Great
Design
Right :)

ARE YOU JEALOUS??????

Thank You :););)
