

Connecting to the JTHS VPN (FortiClient): Your device may need to connect to the JTHS VPN to access certain JT resources - These directions will only work when connected to the Internet while off campus - These directions will not work when connected to the District's Internet.

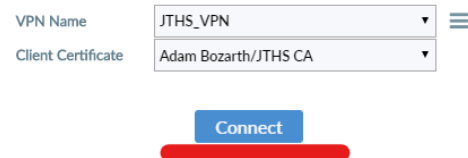

1. Connect to the Internet and click on the small up arrow near the date and time towards the bottom of your screen
2. Locate the green shield icon - if a lock icon appears on the green shield you are already connected.
3. If no lock icon appears - Right click on the green shield and click "Connect to "JTHS_VPN" or "Open FortiClient Console"

4. With the Remote Access section highlighted, click the down arrow in the **Client Certificate** drop down menu.

5. Search for your user name or Student Number under the **user account** heading
6. Click on the entry with your user name or Student Number followed by /JTHS CA and click Connect. If the process does not complete the first time, click Cancel and try again.

7. If successful, you will receive a notification at the bottom of the screen.
8. Once connected to the JTHS VPN you should be able to access select JT resources. For help connecting to the JTHS VPN - please contact the helpdesk at (815) 727-6860.
