

Amity Regional School District Reopening – May 14, 2021 Update

The decision of the district's instruction model is developed in consultation with local health departments and with consideration of the leading and secondary indicators and metrics identified in [Addendum 4](#) of the CT Department of Education's reopening plan. These are identified by [town](#) and by [county](#).

Since October, Superintendents in BOWA have met weekly with health officials from the Orange Department of Health and the Quinnipiack Valley Health District to review weekly data.

Based on the flat or downward trend of the metrics, and the increasing number of individuals who are vaccinated, these regular weekly meetings will no longer be necessary. The school districts and health departments will meet on an as-needed basis to address any sudden changes to the metrics and to discuss and plan end-of-year events and activities. We will also continue to incorporate state mandates and guidance as well as recommendations from the CDC in partnership with the health districts.

Leading Indicator

Leading Indicator	MORE In-Person Learning	Re-assess strategies to determine appropriate balance of in-person and remote learning (hybrid learning)	LESS In-Person Learning
Number of new cases of COVID-19 (14-day average of new cases per 100,000 population per day)	< 10 new cases per 100,000 per day	10 to < 25 cases per 100,000 per day	25+ cases per 100,000 per day

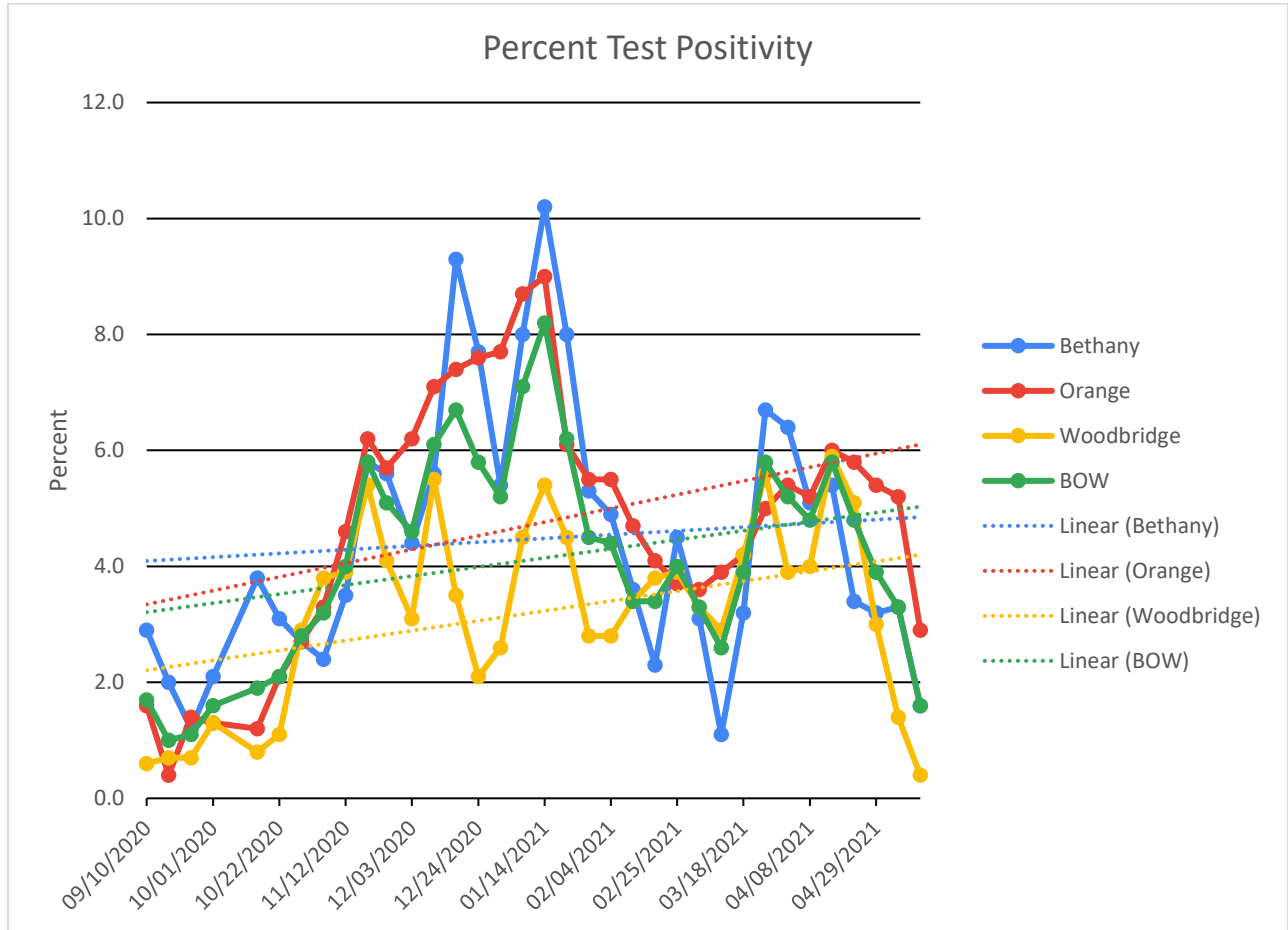

The CSDE and CT DPH use the 14-day average of new cases per 100,000 population per day as the leading indicator for determining the instructional model. The data in the Amity communities since the start of the school year is:

* The DPH changed from a 7-day average to a 14-day average on October 15, 2020.

As noted in Addendum 4, “analyzing any of the suggested leading or secondary indicators at the individual town or school district level in our state may result in rates that are too unstable to be of any use in continuous decision-making.” Amity is fortunate that we can consider all three towns that we serve, as well as the New Haven county indicators when decision-making.

The first of the secondary indicators, percent test positivity, is shown below for all three towns since the start of the school year. While there are fluctuations from data point to data point, the plot of the trend line demonstrates the overall pattern.

The Indicators on COVID-19 hospitalizations and COVID-like and Influenza-like Illness cannot be monitored at the town level, since numbers on the town level are so low. However, it can be monitored at a county level and the data per 100,000 per population per day from New Haven County since the beginning of the school year is as follows:

Reporting Period	COVID-19 Hospitalizations	COVID-like illness
8/30/2020 - 9/5/2020	0.4	1.7
09/06/2020 - 09/12/2020	0.6	1.9

As noted in Addendum 4, “analyzing any of the suggested leading or secondary indicators at the

individual town or school district level in our state may result in rates that are too unstable to be of any use in continuous decision-making.” Therefore, the state also summarizes data by county to assist school districts in decision-making. The May 13, 2021 released data is summarized below. New Haven County is identified in the **moderate** category for both leading and secondary indicators.

Current School COVID Data

The chart below provides a snapshot of the current COVID-19 status of our schools and district. This chart indicates the number of new cases and new quarantines over a 1-week period. Please note that this is a moment in time and the actual number of positive cases in isolation and close contacts in quarantine changes daily. **Below is the May 13, 2021 update.**

Schools are required to report every positive COVID-19 case for all staff and students. This includes staff and students who are working remotely or who have already been quarantined and are not in the school environment. The letters that are sent to the community are only sent when a community member has been in the school recently and contact tracing and notification is required.

Next Steps

Ending Friday Updates

The content of these Friday updates may be less robust as COVID numbers decline daily. We will still continue to communicate with you through the end of the school year, but information may be more limited.

May 19, 2021 State Mandate Changes

On May 19, 2021, all COVID restrictions in the state of Connecticut will be lifted except for the

requirement of masks when indoors. At that time, the Amity Regional School District will – in general – no longer **require** masks when participating in or viewing an outdoor activity. Masks will be strongly encouraged and in cases where safe social distancing cannot be maintained, masks will still be required – even if the event is held outdoors.

At the time of this update, we have not received any guidance from the CSDE or DPH on indoor mask requirements. We will keep you posted as guidance is released.

COVID Vaccinations for Children 12 and Up

Hartford Health has indicated a surplus of supply and ample open appointments to manage the addition of students ages 12-15. Our contact recommends that parents access this [link](#) as information changes daily. The page will provide an option to indicate the age of the person getting the vaccine and then only Pfizer clinics will be available for selection.
