

Magnificat High School
Summer Work for Precalculus or Honors Precalculus

Please **add yourself to the following Google Classroom: 76uftrj**

You are required to complete a summer math assignment to better prepare you for the next math class that you are taking. Due to COVID and the change in schedule, there are some topics that you will cover over the summer using www.khanacademy.org. You should have an account from last year but, if you didn't create one, you can do so with your school gmail account. Once you have logged into your account (or created it), you will need to **add yourself to this class using the code: 4TEUT6W3**. You can do that under "My Account," in the top, right corner under your name. Look for 'joining a class' under the "Teacher" tab.

Watch your school gmail account over the summer. You will be given assignments to watch videos and complete problems during June and July. You will receive a completion grade at the beginning of your next math class. These videos and assignment should take about 1 hour per week for about 6 weeks. You can work at your own pace but we recommend spreading out the work so that you are keeping your math skills fresh over the summer. There will be some optional in-person help sessions for any student who is struggling with the content. Watch the Google Classroom for more information on these sessions.

The teacher who is moderating this work is Ms. Krista House, who can be reached at khouse@maghs.org.
