

# Build a den for you and your teddy

How to build your very own teddy den!

You can use the natural materials around you like sticks, leaves, pinecones and even grass! Use your imagination to build them a magical den. It could be anything you like, a castle, a fort, a tent or even a house. Add some fences, a little garden or even a swimming pool for your teddy to relax in.

Be very careful when collecting leaves, especially from the ground. There may be a lot of stinging nettles growing this time of the year.

Have lots of fun!

Here are some ideas below.....
