Love

When I get older, I hope my love for you gets bolder
I hope we get closer even though we can't get any closer than we are now

I love you so much and I hope you know it
I am proud of your accomplishments because I believe in you
I will always stand beside you even if I am not there with you
I will care for you even if you won't care for me
All of this is because I love you

*I may have only one life to live,
I may have only have one gift to give,
I may only have one life to love,
I may have only one moment to share,
The deep feelings I have for you.*
