

FOOD SERVICES

The primary objective of Food and Nutrition Services is to provide nutritious and appealing meals to the students of South Kitsap School District. This program is considered part of the total educational day by providing nourishment to students, thereby helping to ready them for learning, and by providing opportunities for students to learn about and develop life-long healthy eating habits. The program is designed to maintain the lowest possible price while meeting all federal and state regulations pertaining to the National School Breakfast and Lunch Program. This includes the use of food commodities made available under the Federal Food Commodity Program for school meals. Adults must pay for any meals, or ala carte items obtained from Food and Nutrition Services. It is also the goal of the Food and Nutrition Services to remain financially self-supporting.
