

Dear future AP Chemistry Student,

I am super excited that you are planning to take AP Chemistry next year with me. This is a challenging class that requires commitment, hard work and a love for science. AP Chemistry is meant to be a second-year course; there is a lot of new material to cover and very little time, if any, to review topics we studied in Honors Chemistry.

There are four areas I would consider foundational topics for a solid start in AP Chemistry. I am linking here my unit plans for them with all the resources we used and supporting questions and materials. Please make sure you review these concepts BEFORE we start the next academic year so we can jump right into AP material.

- [Matter & Atomic Theory, U1](#)
- [Quantum Atomic Theory, U2](#)
- [Chemical nomenclature and equations, U3](#)
- [Stoichiometry, U4](#)

You may also want to explore the College Board site for [AP Chemistry](#).

See you in August!

Mrs. Leahy
