

Medications covered under the Essentials by MESSA prescription plan

Use this list to find information about drug coverage and therapeutic options. This list is ordered alphabetically and includes generic and brand name drugs. Drugs are identified according to their tier placement. If a generic equivalent is available, the brand name drug will appear in grey font for informational purposes only as the brand name drug is not covered. Prior authorization (PA), step therapy (ST) or quantity limit (QL) requirements are noted where applicable.

- Prior Authorization (PA): plan approval is required for coverage - Member must meet clinical criteria or additional information must be provided before coverage is approved.
- Step therapy (ST): previous treatment with one or more preferred drugs is required before coverage is approved.
- Quantity limits (QL): prescriptions cannot exceed a specific quantity per fill - These limits are set based on clinical appropriateness and manufacturer-recommended dosing for particular drugs.

We encourage you to talk to your doctor to find the right drug therapies covered by your health plan.

	Up to 34-day supply	90-day supply
Specific preventive medications mandated by federal law are covered 100 percent. Age and gender limits apply.	No cost to you	No cost to you
Tier 1 Generics.	\$10 copayment	\$30 copayment
Tier 2 Most brand drugs with no generic equivalent or therapeutic alternative.	20% coinsurance \$40 minimum - \$80 maximum	20% coinsurance \$120 minimum - \$240 maximum
Tier 3 Brand drugs for which there's a more cost-effective generic alternative or preferred brand name drug.	20% coinsurance \$60 minimum - \$100 maximum	20% coinsurance \$180 minimum - \$300 maximum

Note: The amount you pay for brand name medications varies because coinsurance is based on the price of the drug when it is filled. A drug may switch from one tier to another. Up to a 90-day supply of insulin may be obtained for the same amount as a 34-day supply from any in-network provider. All over the counter (OTC) medications are excluded from coverage unless mandated by the Affordable Care Act (ACA).

When a new generic version of a brand-name drug becomes available, the generic version is generally added to Tier 1. Once the generic drug is added, the original, brand-name version won't be covered. This list is current as of 9/10/2020. It is subject to change without notice. If you have a question about any drug, call MESSA Member Services at 800.336.0013.

If a generic equivalent is available, the brand name drug will appear in grey font for informational purposes only as the brand name drug is not covered and the tier applies to the generic
