\* At least two positive cases with a known connection at school

† Quarantined by the Health Department due to known close contact with someone who has tested positive for COVID-19. The CDC defines a close contact as someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated. As per our local Health Department, students or staff who have shared a classroom for a cumulative total of 15 minutes or more will be considered close contacts.

\* At least two positive cases with a known connection at school

† Quarantined by the Health Department due to known close contact with someone who has tested positive for COVID-19. The CDC defines a close contact as someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated. As per our local Health Department, students or staff who have shared a classroom for a cumulative total of 15 minutes or more will be considered close contacts.

\* At least two positive cases with a known connection at school

† Quarantined by the Health Department due to known close contact with someone who has tested positive for COVID-19. The CDC defines a close contact as someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated. As per our local Health Department, students or staff who have shared a classroom for a cumulative total of 15 minutes or more will be considered close contacts.
