

# Digital Safety at Hampton Middle School

September 11, 2019

## HMS Vision

*Est. October 2018*

Hampton Middle School promotes relevant student-driven learning opportunities to prepare the next generation of leaders and productive citizens in the following ways:

## Digital Literacy and Media “Best Practice”

- Common Sense Media believes that today's kids need to learn to be smart and safe online to thrive in the modern world.
- Common Sense Media's goal is to provide all young people access to high quality digital learning and experiences that will help them create, communicate, and learn in new and effective ways while keeping their personal information safe.
- This is particularly important in the school environment. Education technology, when used appropriately and coupled with a trained teacher corps, is essential to preparing our students for jobs and careers in the 21st century.

## The “Hampton” Model

- Teacher as facilitator of learning & problem solving
- “Just in time” direct instruction
- Technology enables student focused learning and pacing
- Classroom environment is flexible
- Students engaged in a variety of individualized and collaborative tasks
- Focus on critical thinking with content

# Technology as a *Tool*, Not an *Event*

## Safety is a Partnership

- Students should use District-issued devices for educational purposes at home and at school
- Student Device User Agreement Form
- Teacher monitoring and supervision

Hampton Township School District  
Student Device User Agreement  
2019-2020

As a student in the Hampton Township School District, you are being provided access to technology for educational purposes. In order to maintain the privilege of accessing technology, you must follow the Student Handbook, Code of Conduct, and the following:

- Understand that the devices, as well as other District-issued technology, are the property of the District.
- Understand that the District reserves the right to review, monitor, and restrict information stored on or transmitted by the device.
- Use the device in a responsible and ethical manner that upholds the standards of Hampton Township School District.
- Understand that the device is to be used for educational use, not for personal or private purposes.
- Do not uninstall, disable and/or modify any hardware or software installed on the device or install new or additional programs (such as games) on the device.
- Only Hampton teachers, school counselors, principals, and Technology Services Department personnel can access, repair, or service the devices.
- Devices used off school property are also subject to Hampton Board Policies, rules, and regulations.
- Report loss and/or damage of the device to the Student Help Desk located in the Library Media Center. If the loss and/or damage is a result of negligence, your parent or guardian may be held financially responsible.
- Adhere to this Student Device User Agreement in the event you are issued a "loaner" device while your device is being repaired.
- Notify the principal immediately if you receive an electronic communication containing materials that may be unlawful, inappropriate, affected by a virus, and/or a potential violation of the Student Behavior Expectations or Code of Conduct.

## Device Insurance Reminder

Devices for ALL students in grades 2-12 will need to be registered through our [insurance site](#), where parents and guardians will need to either accept or decline insurance for their student's device for the upcoming year. If you missed the August 15 insurance renewal window, **it's not too late to make your insurance decision**, you just won't have coverage until you have completed the necessary steps.

Additional program details, steps to register for insurance, and the 2019-2020

distribution schedule can be found on the District website at <https://www.ht-sd.org/page.cfm?p=6374>

## Student email addresses

Student accounts and email addresses are through the hamptontalbots.org domain (example: [username@hamptontalbots.org](mailto:username@hamptontalbots.org))

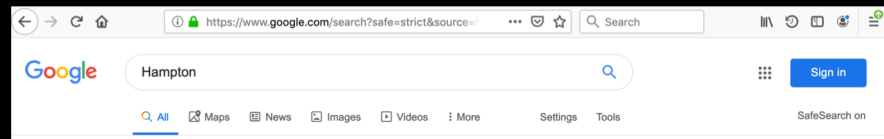

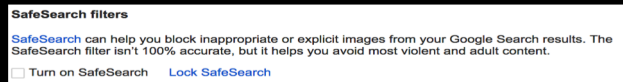

Employee accounts are under the ht-sd.org domain (example: [username@ht-sd.org](mailto:username@ht-sd.org)).

Email for HMS students is restricted to only allow mail within the District domains and a few instructional tools that are used in the classroom for communication within the system and account setup.

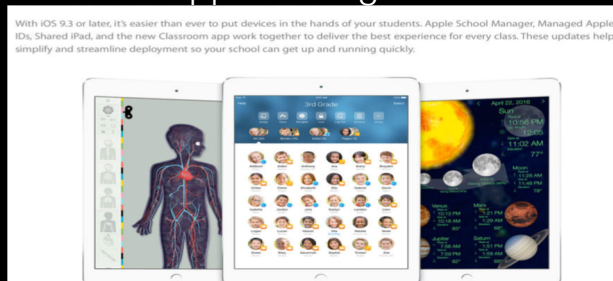

# Internet Filtering

- Overall Internet Web Filter Database and Categories
- URL Database Categories are based upon the Web content viewing suitability of various industries (business, healthcare, education, etc.).
- Each category contains websites or web pages that have been assigned based on their dominant Web content.
- A website or webpage is categorized into a specific category that is likely to be blocked or allowed according to its content.
- When a website contains elements in different categories, the site may fall into multiple categories.
- Enforce Safe Search across search engines including Google, Bing, Yahoo and YouTube Restricted Access.
- No system is 100% perfect

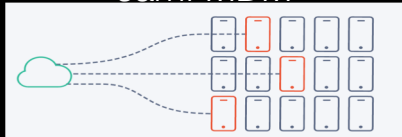

# Device/App Management

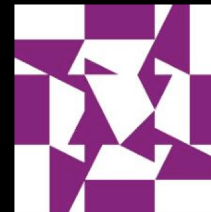

## Apple Management

## Jamf MDM

## Microsoft Intune

## Google Admin

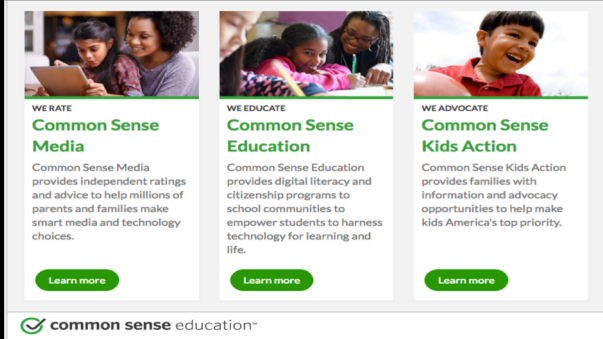

Apple, Google and Windows

District continues expanding Apple/Google capabilities as tools evolve

# Safety and Security

## District Partnerships
