

Demised summary

The table lists the members of the RHSA who have been recorded demised since I made my last report in November 2020.

Deaths 1 – 31 are for the most recent

Deaths 32 – 237 are historical demises since my last report in 2020. Almost all of these follow my research using Family History sites and other sources to determine whether a former student on the InTouch database is still alive or dead. I have always felt it is important to recognise and remember the passing of those former students even if it was many years ago.

These records will be entered on to the database and so complete and "close the file".

A full record of all known demised former men and women who attended the RHS will be placed in the Digital Archive and updated each year.

At the time of writing we now have death records for 3393.
