

Quick overview of what to do and the earliest personnel may return to work, if you had:	
Symptoms WITHOUT a COVID-19 test (answered YES to Question 1)	<p>If you are NOT COVID-19 vaccinated: GET TESTED. Without a test, the business must treat you as being positive for COVID-19 and prohibit you from entering for at least 10 calendar days.</p> <p>If it has been at least 2 weeks since you completed your COVID-19 vaccination: Talk to a healthcare provider to determine when you can return to work and if you need a COVID-19 test.</p>
A positive COVID-19 test WITH symptoms (answered YES to Question 2)	<p>You can return to work:</p> <ul style="list-style-type: none"> • 10 days after first onset of symptoms, AND • You have improvement of symptoms, AND • You have had no fever for over 24 hours without taking fever-reducing medicine
A positive COVID-19 test WITHOUT symptoms (answered YES to Question 2)	<p>You can return to work 10 days after the day your COVID-19 test was collected as long as you have no symptoms.</p>
“Close contact” with anyone with COVID-19 during their contagious period (answered YES to Question 3)	<p>If you are not fully vaccinated, GET TESTED, ideally 6 days or more after your last contact with the person with COVID-19. You can return to work 10 days after your last close contact UNLESS:</p> <ul style="list-style-type: none"> • Your COVID-19 test is positive (see boxes above for positive COVID-19 test) OR • You develop symptoms (GET TESTED if you develop symptoms) OR • You work in a jail, long term care facility, shelter, or dormitory (you cannot return to work until 14 days after your last close contact—check with your employer whether there are staffing shortages that may change this duration) <p>If you are fully vaccinated, you do not need to quarantine after a close contact unless you develop symptoms. You may also not need to get tested. More instructions are available here: www.sfcidcp.org/quarantineaftervaccination.</p>

*“Close contact” means having any of following interactions with someone with COVID-19 while they were contagious (they are contagious 48 hours before their symptoms began until at least 10 days after the start of symptoms). If the person with COVID-19 never had symptoms, they are contagious 48 hours before their COVID-19 test was collected until 10 days after they were tested.

- Within 6 feet of them for a total of 15 minutes or more in a 24-hour period
- Living or staying overnight with them
- Having physical or intimate contact including hugging and kissing
- Taking care of them, or having them take care of you
- Having direct contact with their bodily fluids (coughed or sneezed on you or shared food utensils)

** People are considered fully vaccinated for COVID-19 at ≥2 weeks after they have received the second dose in a 2-dose series (Pfizer-BioNTech or Moderna), or ≥2 weeks after they have received a single-dose vaccine (Johnson and Johnson [J&J]/Janssen)
