Summer 2021

Dear Families of Students Entering Grades 5 – 8,

We hope your children will have an exciting and fun-filled summer – we also hope it will include lots of reading and math!

SUMMER READING

The English and Social Studies Departments have established summer reading requirements and suggestions for students entering Grades 5 – 8.

We also encourage your family to check out [Summer Reading Ideas](#), the curated list of books from our library team. The Park Library offers ebooks and audiobooks which can be accessed through your browser or mobile apps. There is a link to the Sora catalog on the [Summer Academic Resources webpage](#) with instructions for logging in. Current students in the Upper Division, use your Park email address as the library card number. If you are new to Park or having difficulties signing in, please contact [Tory Lane](#), Library Director.

SUMMER MATH

Just as students benefit from reading throughout the summer, regular practice with problem solving, computation, and math facts will maintain and strengthen the mathematical gains made during the school year. For students who would benefit from targeted skill practice, we recommend that families purchase the *Spectrum Math Workbook*. For students seeking more mixed skill review, we recommend *Summer Math Skill Sharpener* workbook. Please purchase the grade level your child just completed.

You'll find all the grade level requirements on the Summer Academic Resource Page: [LINK](#)

Best wishes for a wonderful summer,

Susan Bogue Myslik
English Department Head
