

# Entering Grade 2 Additional Resources

In collaboration with your children's classroom teachers, we have recommended grade-appropriate summer work for Lower Division students. On this page, you'll find some suggestions to help build your child's skills in reading and math this summer.

## Literacy Resources

In addition to reading this summer, your child might want to build additional literacy skills with these suggestions.

1. Lexia  
Log in with the app (Lexia Core5 Reading) or through any internet browser ([www.lexiacore5.com](http://www.lexiacore5.com)) using 2020-21 teacher's email address, student login name, and password.
2. Epic  
Families can sign up for Epic Free to use throughout the summer for 2 free hours of access per day.  
[www.getepic.com/](http://www.getepic.com/)
3. RAZ kids (Reading A-Z)  
Log in with the app "Kids A-Z." Students can use their current username and password though summer.
4. [Journal Buddies](#)

## Math Resources

1. We recommend the [Summer Math Skills Sharpener](#) workbook for your child's **current** grade level as a great way to review math concepts. This series helps students review and strengthen math skills without added screen time. Designed for four days per week of summer. (For current families receiving financial aid, you will find a copy of the workbook in your child's backpack.)
