# Xfinity Firewall Settings for iPads

First login to your modem/router. The address was http://10.0.0.1/ The default username is admin and the default password is password. It may make you change the password the first time you sign in.

Click Firewall and then IPv4 to get to the Firewall settings.

Choose minimum security which should allow the iPad to connect back to our offices.

Gateway > Firewall > IPv4

Manage your firewall settings.   more

Firewall Security Level

○ **Maximum Security (High)**

○ **Typical Security (Medium)**

● **Minimum Security (Low)**

○ **Custom Security**

SAVE SETTINGS   RESTORE DEFAULT SETTINGS

After that click save settings and restart the iPad. You can do this by holding down the power button until it shows the menu to shut down. Then turn it back on with the power button.
