HARVEST of the MONTH STRAWBERRIE

The strawberry, a member of the rose family, is the only fruit with seeds on the outside.

The combination of nutrients in strawberries leads to the prevention of cancer cells and is highest in antioxidant values, helping prevent cataracts and other eye degeneration.

The American Indians introduced the Colonists to strawberries. The crushed berries were mixed with cornmeal and baked into bread. After trying this bread, Colonists developed their own version of the recipe and created Strawberry Shortcake.
