Model United Nations

Due to COVID, people all over the world are experiencing situations of extreme difficulties and having to adapt to new lifestyles, whether they may be self-isolation, online schooling or even just putting on a mask.

The MUN Secretariat organized an internal MUN event in December for grade 7 & 8 students around the MUN Millennium Development Goals. This event introduced the middle school students to the MUN debating procedures and exposed them to the United Nations goals for the future.

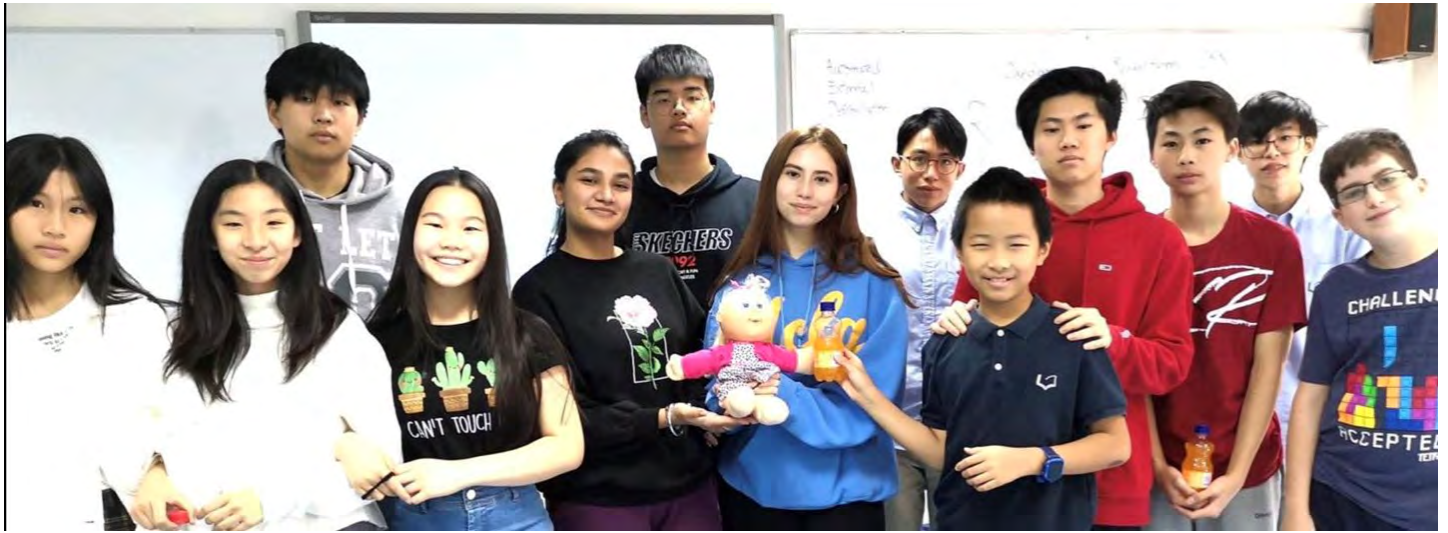

The HIS MUN group joined a virtual conference in March to work with other schools around China. The focus on collaboration and skill building in MUN procedural practice was a great way to keep the students progress continuing.

The HIS MUN club is a program that is continuing to address important topics and global issues. We are proud of what we have accomplished in the last year, even facing the difficulties that this year has presented.

Global Issues Network

The Global Issues Network this year has contributed to making our society more sustainable and eco-friendly through the various student-led projects organized. The GIN team has organized several trash picking hikes and rummage sales throughout the year while maintaining a community garden. Several volunteering opportunities were also organized including monthly visits to a local hospital and school. Nonetheless, fundraisers were also organized including the upper school talent show, “Memories of 2020” project, and the annual greeting cards competition. All in all, it was a successful year for the Global Issues Network as 6 charities and school were supported, more than 23,000 RMB funds were raised, and 725+ hours of service were contributed to the Hangzhou community. We hope to see you in the club next year!
