Board of Education Workshop

- EASTCONN Update

Dr. Ravit Stein, Dr. Rose Jaffery and Dr. Chris Barclay gave an update of EASTCONN's consultative work for the district special education programs in K-5, with plans for similar work in the middle and high school. Areas covered include systems/processes, transitions between schools, program-wide behavior plans and supports, and teaming supports and training for district personnel. 2021-2022 plans include maintaining the SMILE (Suffield Makes Individualized Learning Effective) program at the PK-5 level, implementation of protocols for transitions between schools, and improving the MTSS (Multi-Tiered System of Supports) at all levels.

Board members asked questions about the sources of data presented by EASTCONN; the number of students qualifying for these programs as compared to the former ACHIEVE program; the process for recording relevant student behavior data; whether the distribution of district students follows the 80/15/5% expected split described in the tiered instruction model; whether the relevant document examples (e.g., on-boarding, transition forms) could be shared with the Board to aid in understanding; and the expected timeline of EASTCONN's consulting services in district. Board members expressed the desire to focus on transitions between schools; requested to receive data specifically addressing student outcomes; recognized that the compilation of detailed data may compromise instructional time with students; and reiterated the importance of parental input as these systems are implemented.

Adjournment

Dudack moved, Finnigan seconded to adjourn the meeting at 8:44 p.m. All members voted in favor.
