*Supervise children! Dry ice can quickly burn you and cause frostbite. Do not touch it for long, and you may wish to wear winter gloves as a precaution.

Ice Cream

*Instead of the regular ice and table salt in this recipe, you can substitute in dry ice (w/ no salt). The ice cream will generally form faster. However, you **MUST BE VERY CAREFUL** when using this method as dry ice can quickly burn you and cause frostbite. Keep the bag moving and you can wear winter gloves as a precaution! Supervise children!

Italian Gelato

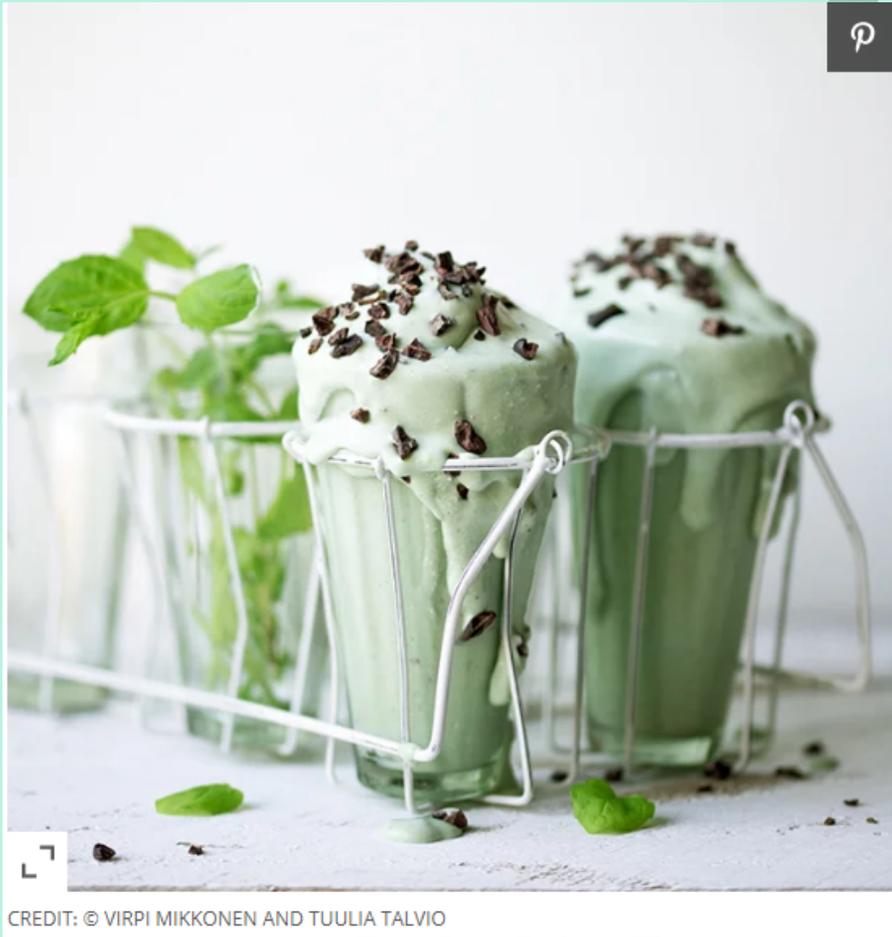

*Read it through but it sounds as though you can make the gelato with or without eggs depending on your texture/richness preference.
