

Palos 118 Summer Math SPLASH Challenge!

This summer, we are encouraging all students entering 1st through 8th grade to complete a minimum of 30-minutes of math practice per week over the summer. We are challenging them to do more! Students entering grades 1-3 will utilize Dreambox Math, and students entering grades 4-8 will use MAP Accelerator. Students are familiar with these programs and can log-in on any device using their Classlink account.

Why is the word SPLASH in the challenge? If each building meets its summer goal, the PFA has agreed to rent a dunk-tank so that students who participated can have an opportunity to dunk their favorite principal. We want our students to make a SPLASH this summer with improving their math skills.

How will data be tracked over the summer? Both programs, Dreambox Math and MAP Accelerator digitally keep track of student usage. Using these programs, parents do not have to fill out any forms.

How will students remember their logins for the summer? Each child has received a printout of their updated username and password, which were sent out with report cards. You can also find this information in the Portfolio Tab of the Skyward Parent Portal. The updated passwords will take effect later in the day on Monday, June 21.

What if a student does not have a device at home to use over the summer? A loaner device will be available to families in need of a device at home through the Tech department. Families can contact tech support at studenttech@palos118.org.

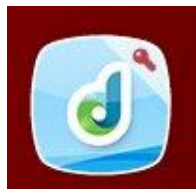

Who do I contact if I have any questions or need technical support during the summer? Parents should use the emails below. Each building will have a facilitator to support families. Families can always contact tech support at studenttech@palos118.org.

Palos East - esplash@palos118.org
Palos West - wsplash@palos118.org
Palos South - ssplash@palos118.org

When will the building celebrations take place? The dunk tank activities will be scheduled for August 16, 17, & 18. Other recognition for top users and random drawings will be announced through Seesaw, Schoology, email, and social media throughout the summer.
