

**Wingate University Health Center**

**Covid Vaccination Policy**

Effective immediately, those who have been fully vaccinated against Covid-19 (who have exceeded 2 weeks or more past their final vaccination injection) with an FDA or WHO approved vaccine, are not required to wear face coverings while on campus (outdoors or indoors). Those who have not been fully vaccinated are encouraged to continue to wear face coverings at all times unless in an individual office or outdoors where social distancing can be accomplished. Anyone who feels more comfortable wearing a face covering is encouraged to do so whenever there are large groups gathered where social distancing is not possible. Please continue to be vigilant and take appropriate precautions to eliminate the spread of COVID. We encourage full vaccination against Covid-19, but do not require it for students, faculty, and staff. We will continue to monitor CDC and NC DHHS guidance, and reserve the right to modify this policy in light of new guidance.
