

# Math Pathways from Middle School to High School

The pathway below is the typical pathway students follow through our mathematics course sequence. There are other options for electives throughout the pathway that are not shown here. For more information on the options, consult the Program of Studies posted on each high school website.

\*Algebra 2 is a required course for graduation

\*\*To reach AP Calculus in high school, a student must be course-accelerated during middle school or double up in math courses in high school.
