

Parents,

Welcome to XLR8 Drivers Education. For the past ten years, parents and students have been moving from bricks-and-mortar drivers ed to online products for the sake of convenience and self reliance. As this shift has taken place, many products have been developed to address the drivers education needs of the general population. Unfortunately, the special needs population has been left behind in this shift. Students with learning differences have had to struggle through hundreds of pages of heavily text based learning environments to achieve their drivers licenses.

XLR8DrivingSchool.com was developed to address those oversights. Designed by a certified special educator with a Masters in Education, 15 years of classroom experience, AP and Principal; XLR8 is the only program that targets students with learning differences. We have incorporated many modifications including, larger fonts, more white space, less concepts per page, text-to-speech, checks for understanding, reteaching opportunities, videos and hands-on exercises.

XLR8DrivingSchool.com is a comprehensive, online, parent taught driver's education program that includes everything necessary to become a licensed driver in the state of Texas. Visit our website today to get started!

www.XLR8drivingschool.com

Featuring -
