

Lodi USD Music Guidelines and Protocols, 7/23/2021

Until further notice all wind, choir, and full/partial band shall occur under the following guidelines:

1. Bell covers should be used for all woodwinds and brass and should be made with a multi-layer cover with the center layer being made of MERV-13 filter material, or a 3-layer surgical style mask using an ASTM F2100 or GB/T32610 standard.
2. Singers and instrumentalists should wear a well-fitted 3-layer surgical-style mask that meets the ASTM F2100 or GB/T32610 standard to reduce aerosol emission. Instrumental players may have a slit in their mask to allow the insertion of their mouthpiece. The slitted mask does not replace the instrumentalist's usual mask and is only used when actively playing their instrument.
3. All instruments may be used indoors, as follows -
 - a. Masking per guideline #2
 - b. Minimum of three (3) feet of spacing between participants, ideal spacing is six (6) feet
4. Performing arts activities should happen on a reduced schedule:
 - a. Indoors – 30-minute maximum restriction with Medify air filter running with full ionization feature
 - b. Outdoors – no restrictions
5. Rehearsal space recommendations in order of preference:
 - a. Outdoor rehearsals, using individual mitigation techniques described above in Guidelines 1 & 2.
 - b. Indoors in classrooms with Medify air filter running with full ionization feature
 - c. Indoors MP Rooms and Gymnasiums maintain three (3) foot spacing minimum
6. Practice good hygiene by washing hands, using sanitizers, and preventing uncontrolled spit valve release.
7. As of the date of this posting, advance Cabinet approval is required for any in-person, live event

**Staff and Students who are not fully vaccinated are encouraged to wear a face covering in crowded outdoor settings or during activities that involve sustained close contact (including high-risk contact sports) with other unvaccinated individuals.*
