

Date _____

Today your child bumped his/her head while here at school. He/she was brought to the clinic for an assessment. Please see attached sheet. Below are listed signs and symptoms to watch for this evening.

If your child:

- Loses consciousness
- Begins to vomit
- Becomes disoriented
- Becomes unusually drowsy and you are unable to arouse
- Begins to walk unsteadily or falls while attempting to walk
- Has one pupil larger than the other
- Begins to have bleeding from an ear and/or nose (that has not been hit)

Call 911 and/or the child's doctor

School Nurse
