

Name of Student: _____

Date: _____

Dear Parent/Guardian(s):

A review of your child's school health records show they do not contain the necessary documentation for the immunization(s) checked below:

Diphtheria/Tetanus Toxoids/Pertussis (DPT, DTaP)

Tdap

Poliomyelitis Vaccine (OPV or IPV)

Measles

German Measles (Rubella) Vaccine

Mumps Vaccine

Hepatitis B

Varicella (Chicken Pox) (for individuals born on or after 01/01/97)

The Virginia State Law requires that all students who are enrolled in any Virginia school be adequately immunized and protected against certain diseases. Students cannot continue in school unless they have on file in their school records appropriate documentation of completed immunizations (or a plan for the completion of their immunizations) dated and signed by a physician or an official of the Health Department.

Please provide immediately the necessary documentation of adequate immunization (dated and signed by a physician) for the immunization(s) checked above. If you do not have appropriate documentation, please fill out and sign the enclosed "Consent for Release for Information" form and mail it to your child's previous school or medical doctor. If your child has not had the appropriate immunization(s), please contact your doctor or the Health Department (434) 972-6269 to arrange for your son/daughter to receive the necessary immunization(s) and then bring (or send) the completed immunization form to the school. If you have any questions about these requirements, please call the school at _____.

Sincerely,

School Nurse
