

ABOUT US

We are a free public school for families who believe their children deserve a dynamic, high-quality, fun and challenging school experience.

Academy Prep is comprised of three locations across the Antelope Valley and is built off the success of award-winning engineering, health careers and early college programs within the Antelope Valley Union High School District. We offer small class sizes, full access to Makerspace technology, and 1-1 technology in a safe learning environment. We believe in challenging students to realize their passions through providing them with an engaging, rigorous curriculum where learning takes on a whole new meaning.
