## HOME-BASED COVID-19 SCREENING TOOL

---

A student, staff member, or potential school visitor experiencing any of the following symptoms should stay home from school and seek counsel from their healthcare provider for testing and care, regardless of vaccination status.

- Fever or chills
- Cough
- Fatigue or headache
- Loss of taste or smell
- Shortness of breath or difficulty breathing
- Body aches
- Sore throat
- Nausea, vomiting, or diarrhea
- Congestion or runny nose

Some of these symptoms may be considered less common or less severe than others and are also associated with diseases other than COVID-19. Others may warrant staying home from school, regardless of the presence of additional symptoms. In either case, the usual procedures for returning to school apply if additional symptoms do not develop and/or it has been determined the symptoms are not due to COVID-19. (e.g. A child with a fever must be free of fever for 24 hours before returning to school).
