

**Covid-19 Risk assessment revised for September opening
2021**

This risk assessment documents the risk control measures that will be in place ahead of school opening to all students on their return to the new academic year in September 2021. It is based on the revised operational guidance issued to schools on July 19th 2021 reflecting the move to Step 4 of the roadmap. The risk assessment should be viewed in conjunction with the 'Outbreak Management Plan'.

The key changes are:

- Face coverings are no longer advised to be worn when within the building by pupils, staff and visitors
- The removal of 'bubbles', allowing pupils to mix
- The removal of contact tracing by schools
- Mass testing of students on return and twice-weekly home testing of staff and students until a review at the end of September

The document is based on the following government guidance:

- > [Schools Covid-19 operational guidance](#)
- > [Health and safety: responsibilities and duties for schools](#)
- > [COVID-19: cleaning in non-healthcare settings outside the home](#)

RAG rating:

- > Red: this measure cannot be put in place in our school
- > Yellow: this measure isn't in place yet, or cannot be implemented yet but can be in place for the return date or as and when required
- > Green: this measure is already in place
