

PUBLIC SCHOOLS OF EDISON TOWNSHIP  
OFFICE OF CURRICULUM AND INSTRUCTION

Algebra 1

Length of Course:	Term
Elective/Required:	Required
Schools:	Middle/High School
Eligibility:	Grade 7 - 12
Credit Value:	N/A - 5 Credits
Date Approved:	August 24, 2020
Date Revised:	August , 2021

## TABLE OF CONTENTS

Introduction	3
High School Pacing Guide	5
Scope and Sequence	9
Unit 0: Preparing for Algebra	10
Unit 1: Solving Equations and Inequalities	12
Unit 2: Linear Equations and Systems	16
Unit 3: Graphing Family of Functions	20
Unit 4: Polynomials	25
Unit 5: Quadratic Functions and Equations	28
Unit 6: Exponents and Exponential Functions	31
Unit 7: Radicals and Radical Expressions	34
Unit 8: Rational Functions	37
Unit 9: Data Analysis	41

## INTRODUCTION

The New Jersey Student Learning Standards (NJSLS) for Mathematics are intended to provide students with a solid foundation in expressions, equations and inequalities, and connections to modeling and functions.

This curriculum guide is standards based which reflects the NJ Student Learning Standards for Mathematics, the Mathematical Practices that are expected to be used in teaching mathematics K-12 are as follows and infused throughout the guide:

- Make sense of problems and persevere in solving them.
- Use appropriate tools strategically.
- Reason abstractly and quantitatively.
- Construct viable arguments and critique the reasoning of others.
- Model with mathematics.
- Attend to precision.
- Look for and make use of structure.
- Look for and express regularity in repeated reasoning.

### **New Jersey Student Learning Standards for Mathematics Algebra 1 Overview:**

#### **Seeing Structure in Expressions**

- Interpret the structure of expressions
- Write expressions in equivalent forms to solve problems

#### **Arithmetic with Polynomials and Rational Functions**

- Perform arithmetic operations on polynomials
- Understand the relationship between zeros and factors of polynomials
- Use polynomial identities to solve problems
- Rewrite rational expressions

#### **Creating Equations**

- Create equations that describe numbers or relationships

#### **Reasoning with Equations and Inequalities**

- Understand solving equations as a process of reasoning and explain the reasoning
- Solve equations and inequalities in one variable
- Solve systems of equations
- Represent and solve equations and inequalities graphically

#### **Interpreting Functions**

- Understand the concept of a function and use function notation
- Interpret functions that arise in applications in terms of the context
- Analyze functions using different representations

**Building Functions**

- Build a function that models a relationship between two quantities
- Build new functions from existing functions

**Linear, Quadratic, and Exponential Models**

- Construct and compare linear and exponential models and solve problems
- Interpret expressions for functions in terms of the situation they model

The purpose of the revision was to further integrate the practice standards as well as incorporate technology in a meaningful way to enhance instruction and learning.

Learning mathematics with understanding is essential to enable students to problem solve. Students learn mathematics by doing not just by listening and memorizing. When mathematical facts are connected, taught in a contextual setting, applied to real world application and infused with technology, knowledge is more likely retained.

## HIGH SCHOOL PACING GUIDE

## Marking Period 1

0.2 Real Numbers (exclude square roots)	1 day
0.3 Operations with Integers	1 day
0.4-0.5 Operations with Rational Numbers	1 day
1.2 Order of Operations	2 days
1.4 Combining Like Terms & Distributive Property	2 days
<b>* Review &amp; Quiz (0.2-0.5, 1.2, 1.4)</b>	2 days
1.1/2.1 Variables and Expressions (words to algebra, algebra to words)	1 day
2.2 One-Step Equations	1 day
2.3 Two-Step/Multi-Step Equations	2 days
2.4 Variables on Both Sides	2 days
<b>* Review &amp; Quiz (1.1, 2.1-2.4)</b>	2 days
2.5 Absolute Value Equations	2 days
2.8 Literal Equations	2 days
2.6 Proportions	1 day
<b>* Review &amp; Test (1.1, 2.1-2.6, 2.8)</b>	3 days
5.1/5.2 Solving One-Step Inequalities	1 day
5.3 Multi-Step Inequalities	1 day
5.1-5.3 Solving Word Problems With Inequalities	1 day
<b>* Review &amp; Quiz (5.1-5.3)</b>	2 days
5.4 Compound Inequalities	2 days
5.6 Absolute Value Inequalities	2 days
5.4/5.6 Practice	1 day
<b>* Review &amp; Test (5.1-5.4, 5.6)</b>	3 days
1.6 Relations	1 day
1.7 Functions	2 days
<b>Review &amp; Quarterly #1</b>	3 days

**Total: 45 days**

## Marking Period 2

Graphing with a Table	2 days
3.5 Arithmetic Sequences	1 day
<b>* Review &amp; Quiz (1.6-1.7, Graphing with a Table, 3.5)</b>	2 days
3.0 Identifying Linear Functions	1 day
3.1 Graphing Using Intercepts	1 day
3.3 Rate of Change & Slope Formula	2 days
3.4 Direct Variation	2 days
<b>* Review &amp; Quiz (3.0-3.4)</b>	2 days
4.1 Graphing Equations in Slope-Intercept Form	2 days
<b>* Review &amp; Test (3.0, 3.1, 3.3, 3.4, 4.1)</b>	3 days
4.2 Writing Linear Equations in Slope-Intercept Form (except two points)	1 days
4.3 Writing Linear Equations Given a Point and a Slope	2 days
<b>* Review &amp; Quiz (4.2-4.3)</b>	2 days
(Winter Break)	
4.2/4.3 Review	1 day
4.4 Parallel & Perpendicular Lines	4 days
4.2 Writing Equations Given Two Points	2 days
<b>* Review &amp; Test (4.1-4.4)</b>	3 days
How many solutions?	1 day
6.1 Solving Systems of Linear Equations by Graphing	1 day
5.6 Graphing Inequalities	2 day
6.6 Solving Systems of Inequalities by Graphing	2 days
<b>* Review &amp; Test (6.1, 5.6, 6.6)</b>	3 days
<b>Review &amp; Quarterly #2</b>	3 days

**Total: 45 days**

## Marking Period 3

6.2 Solving Systems by Substitution	2 days
6.3 Solving Systems by Elimination (Quick Cancel)	1 day
6.4 Solving Systems by Elimination (Multiply First)	3 days
6.2-6.4 Special Systems (No solution/Infinitely Many)	1 day
<b>* Review &amp; Test (6.2-6.4)</b>	3 days
8.1 Classifying, Adding & Subtracting Polynomials	1 day
7.1/7.2 Multiplying & Dividing Monomials	2 day
8.2 Multiplying a Polynomial by a Monomial	1 day
8.3/8.4 Multiplying Polynomials	2 days
<b>* Review &amp; Test (7.1, 7.2, 8.1-8.4)</b>	3 days
8.5 Factor by GCF	2 day
8.5 Factoring by Grouping	2 days
<b>* Review &amp; Quiz (8.5)</b>	2 days
8.6 Factoring Trinomials $LC=1$ (no solving) (incorporate perfect square trinomials)	1 day
8.7 Factoring Trinomials with $LC>1$ (no solving)	2 days
8.8 Difference of Perfect Squares	1 day
<b>* Review &amp; Test (8.5-8.8)</b>	3 days
8.6/8.7 Solving by Factoring	2 days
<b>* Review &amp; Quiz (Solving by Factoring)</b>	2 days
9.1/9.2 Characteristics of Quadratic Functions & Solving by Graphing	2 days
9.1 Graphing Quadratic Functions	2 days
9.3 Transformations of Quadratic Functions	2 days
<b>Review &amp; Quarterly #3</b>	3 days

**Total: 45 days**

## Marking Period 4

<b>* Review &amp; Test (9.1-9.3)</b>	3 days
10.2 Simplifying Radical Expressions	2 days
10.3 Adding & Subtracting Radical Expressions	1 day
10.3 Multiplying Radical Expressions	1 day
10.3 Dividing Radical Expressions (Rationalizing)	2 days
<b>* Review &amp; Quiz (10.2-10.3)</b>	2 days
10.4 Solving Using Square Roots	2 days
9.4 Solving by Completing the Square	3 days
9.5 The Discriminant	1 day
9.5 The Quadratic Formula	2 days
<b>* Review &amp; Test (10.4, 9.4-9.5)</b>	3 days
7.5 Exponential Functions	1 day
7.6 Exponential Growth & Decay	2 days
7.6 Compound Interest	1 day
7.7 Geometric Sequences	1 day
<b>* Review &amp; Quiz (7.5-7.7)</b>	2 days

**Review & Quarterly #4** 3 days

**Total: 32 days**

**Total Class Periods: 167**

## SCOPE &amp; SEQUENCE

<u>Unit 0: Preparing for Algebra (10 days)</u>	<u>Unit 5: Quadratic Functions and Equations (20 days)</u>
<u>Unit 1: Solving Equations and Inequalities (20 days)</u>	<u>Unit 6: Exponents and Exponential Functions (20 days)</u>
<u>Unit 2: Linear Equations and Systems (22 days)</u>	<u>Unit 7: Radicals and Radical Expressions (16 days)</u>
<u>Unit 3: Graphing Family of Functions (26 days)</u>	<u>Unit 8: Rational Functions (14 days)</u>
<u>Unit 4: Polynomials (12 days)</u>	<u>Unit 9: Data Analysis (10 days)</u>
-	Total Days: 170

**Note - Teachers will adjust their timing and pacing as they feel necessary to accommodate actual class periods available.**

**Unit 0: Preparing for Algebra**

<b>Essential Questions</b>	<b>Enduring Understandings</b>
<ul style="list-style-type: none"> <li>• How are the operations of real numbers related?</li> <li>• How can real numbers be used to communicate ideas in the real world?</li> <li>• Why is it helpful to have several different representations of the same expression?</li> <li>• What can the structure of an algebraic expression reveal about the mathematical or real-world situation it models?</li> </ul>	<ul style="list-style-type: none"> <li>• Expressions are used to describe patterns and real-life situations.</li> <li>• Operations can be used to represent verbal and algebraic models.</li> <li>• Symbols can be manipulated by using the order of operations to model and demonstrate real-life relationships.</li> </ul>

<b>Core Content</b>		<b>Instructional Actions</b>	
<b><u>Objectives</u></b>	<b><u>Alignment to NJSL</u></b>	<b><u>Recommended Activities/Strategies</u></b>	<b><u>Assessment Check Points</u></b>
<p>Write verbal expressions for algebraic expressions.</p> <p>Write algebraic expressions for verbal expressions.</p> <p>Evaluate numerical expressions by using the order of operations.</p> <p>Evaluate algebraic expressions by using the order of operations.</p> <p>Use the Distributive Property to evaluate expressions.</p>	<p>A.SSE.1a Interpret terms, factors, coefficients, and expressions (including complex linear and exponential expressions) in terms of context.</p> <p>A.SSE.1b - Interpret complicated expressions by viewing one or more of their parts as a single entity.</p> <p>A.SSE.2 - Use the structure of an expression to identify ways to rewrite it.</p>	<p><i>Glencoe Algebra 1 textbook Sections: 1.1, 1.2, 1.3, 1.4</i></p> <p>1.1 - Variables &amp; Expressions <a href="#">Writing Expressions</a></p> <p><a href="#">IXL - Write variable expressions (Algebra 1 practice)</a></p> <p>1.2 - Order of Operations <a href="#">Order of Operations Millionaire Game</a></p> <p><a href="#">Order of Operations With Exponents and Parentheses Math Quiz</a></p> <p>1.3 - Properties of Numbers <a href="#">Properties of Numbers Quiz</a></p> <p><a href="#">Properties of Real Numbers</a></p>	<p>Quiz assessment after the 4 sections have been completed.</p>

### Instructional Adjustments:

#### *Modifications/Student difficulties/Common errors:*

- Emphasize note taking strategies
- Use guided notes when necessary
- Revisit and study notebook
- Create vocabulary notecards
- Use tools/manipulatives/models
- Reword application problems
- Use handouts/graphic organizers

#### *Online resources from textbook:*

- Investigation Animations
- Vocabulary Review Games
- Multilingual eGlossary
- Personal Tutor Interactive Videos
- Virtual Manipulatives
- Graphing Calculator Practice
- Foldables

- Review peer work and provide feedback
- Complete error analysis process.
- Use Google Apps for Education
- Use supplemental programs such as:
  - Delta Math
  - Desmos
  - Discovery Education
  - EdPuzzle
  - Edulastic
  - Geogebra
  - iXL
  - Khan Academy
  - Math-Games
  - Math Planet
  - PurpleMath
  - Quia
  - Quizizz
  - Soft Schools
- Create a study guide for intervention
- Build a glossary notebook

- Self-Check Practice
- Chapter Resource Worksheets
- Word Problem Practice
- Enrichment Activities
- Online Self-Check Quiz
- 5-Minute Check Ins

Unit 2: Linear Equations and Systems	
Essential Questions	Enduring Understandings
<ul style="list-style-type: none"> <li>• What does the slope of a line represent?</li> <li>• Compare and contrast the slope of parallel lines and perpendicular lines.</li> <li>• How can a linear function be used to model real world situations?</li> <li>• What is the best method to solve a system of linear equations?</li> <li>• How do you solve a system of linear inequalities?</li> <li>• What are possible solution sets for systems of equations and inequalities?</li> </ul>	<ul style="list-style-type: none"> <li>• Slope shows the relationship between changing dependent variables over changing independent variables.</li> <li>• Slope-intercept, point-slope, and standard form are interdependently related and can model real world situations.</li> <li>• The relationship between two lines can be determined by comparing their slopes and y-intercepts.</li> <li>• Systems of equations can be solved graphically, by substitution, or by elimination.</li> <li>• Systems of inequalities can be solved by graphing.</li> <li>• Systems of equations and inequalities model real world situations to form possible solution sets to a given problem.</li> </ul>

### Unit 3: Graphing Family of Functions

#### Essential Questions

- How can you represent and describe functions?
- How can functions describe real- world situations?
- What does the domain and range of function represent? How is that applied to real world scenarios?
- Compare and contrast the characteristics of linear, quadratic, absolute-value, cubic, exponential, and square root functions.

#### Enduring Understandings

- Functions are a special type of relation where each value in the domain is paired with exactly one value in the range.
- The vertical line test and mapping diagrams help to determine whether a relation is a function.
- Some functions can be graphed or represented by equations
- Relations and functions can be represented by a table of values, mappings, and graphs to determine the following:
  - Domain and range
  - Independent and Dependent Variables
  - Continuous and discrete functions
  - Function or relation?
- Tables, equations, and graphs are independently related ways to represent linear functions.
- Graphs can be used to visually represent the relationship between two variable quantities as they change.
- The set of all solutions of an equation forms its graph.
- A graph may include solutions that do not appear in a table.
- Many real-world functional relationships can be represented by equations.
- Equations can be used to find the solution of given real-world problems.
- The value of one variable may be uniquely determined by the value of another variable. This relationship may be represented in words, tables, equations, sets of ordered pairs, and graphs

**Instructional Adjustments:***Modifications/Student difficulties/Common errors:*

- Emphasize note taking strategies
- Use guided notes when necessary
- Revisit and study notebook
- Create vocabulary notecards
- Use tools/manipulatives/models
- Reword application problems
- Use handouts/graphic organizers
- Review peer work and provide feedback
- Complete error analysis process.
- Use Google Apps for Education
- Use supplemental programs such as:
  - Delta Math
  - Desmos
  - Discovery Education
  - EdPuzzle
  - Edulastic
  - Geogebra
  - iXL
  - Khan Academy
  - Math-Games
  - Math Planet
  - PurpleMath
  - Quia
  - Quizizz
  - Soft Schools
- Create a study guide for intervention
- Build a glossary notebook

*Online resources from textbook:*

- Investigation Animations
- Vocabulary Review Games
- Multilingual eGlossary
- Personal Tutor Interactive Videos
- Virtual Manipulatives
- Graphing Calculator Practice
- Foldables
- Self-Check Practice
- Chapter Resource Worksheets
- Word Problem Practice
- Enrichment Activities
- Online Self-Check Quiz
- 5-Minute Check Ins

Unit 7: Radicals and Radical Expressions	
Essential Questions	Enduring Understandings
<ul style="list-style-type: none"> <li>How are radical expressions represented?</li> <li>Why can't all properties of square roots be used to simplify radical expressions?</li> </ul>	<ul style="list-style-type: none"> <li>Rational exponents can be used to represent radicals.</li> <li>Radical expressions can be simplified using the multiplication and division properties of square roots.</li> <li>Rationalizing the denominator of a radical expression removes the radical from the denominator completely.</li> <li>The denominators of some radical expressions can be rationalized by multiplying by conjugates.</li> <li>The properties of real numbers can be used to perform operations with radical expressions.</li> </ul>

Unit 8: Rational Functions	
Essential Questions	Enduring Understandings
<ul style="list-style-type: none"> <li>Compare and contrast rational expressions to fractional expressions.</li> <li>How can you identify an asymptote algebraically?</li> <li>How can you check that you have simplified a rational expression correctly?</li> <li>What are extraneous solutions?</li> </ul>	<ul style="list-style-type: none"> <li>Inverse variation can be represented by the equation <math>y=k/x</math>, where <math>k</math> represents a constant known as the constant of variation or constant of proportionality.</li> <li>The product rule for inverse variations can be used to write an equation and solve real-world problems.</li> <li>A rational function is nonlinear.</li> <li>Any variable that results in a denominator of zero in a rational function is excluded from the domain of the function.</li> <li>An asymptote is a line that the graph of a function approaches.</li> <li>A rational expression is an algebraic fraction whose numerator and denominator are polynomials.</li> <li>A rational expression is in simplest form when the numerator and denominator have no common factors except 1.</li> <li>To multiply and divide rational expressions, you use the same rules as multiplying or dividing fractions.</li> <li>To add or subtract rational expressions with uncommon denominators you must find the least common denominator.</li> <li>A rational equation contains one or more rational expressions.</li> <li>Solutions that are excluded from the solution set are called extraneous.</li> </ul>

Core Content		Instructional Actions	
<u>Objectives</u>	<u>Alignment to NJSLs</u>	<u>Recommended Activities and Strategies</u>	<u>Assessment Check Points</u>
Identify and use inverse variation  Graph inverse variations  Identify excluded values  Identify and use asymptotes to graph rational functions	A-CED.A.2: Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.  F-IF.C.7b: Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.	<i>Glencoe Algebra 1 textbook</i> Sections: 11.1, 11.2, 11.3, 11.4, 11.6, 11.8  11.1 - Inverse Variation <a href="#">Intro to direct &amp; inverse variation (video)</a>  11.2 - Rational Functions <a href="#">Graphs of rational functions (practice)</a>	Check for understanding after sections 11.1, 11.2, 11.3, 11.4, 11.6 - Quiz  Assessment after all sections including 11.8 - Test

<p>Identify values excluded from the domain of a rational expression</p> <p>Simplify rational expression</p> <p>Multiply rational expressions</p> <p>Divide rational expressions</p> <p>Add/Subtract rational expressions with like denominators</p> <p>Add/Subtract rational expressions with unlike denominators</p>	<p>F-IF.C.9: Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). For example, give a graph of one quadratic function and an algebraic expression for another and say which has the larger maximum.</p> <p>F-BF.B.3: Identify the effect on the graph of replacing <math>f(x)</math> by <math>f(x)+k</math>, <math>kf(x)</math>, <math>f(kx)</math>, and <math>f(x+k)</math> for specific values of <math>k</math> (both positive and negative); find the value of <math>k</math> given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. Include recognizing even and odd functions from their graphs and algebraic expressions for them.</p> <p>F-IF.B.4: For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.</p> <p>F-IF.B.5: Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. For example, if the function <math>h(n)</math> gives the number of person-hours it takes to assemble <math>n</math> engines in a factory, then the positive</p>	<p><a href="#">Rational functions: asymptotes and excluded values</a></p> <p>11.3 - Simplifying Rational Functions <a href="#">Intro to simplifying rational expressions (article)</a></p> <p><a href="#">Simplifying Rational Expressions</a></p> <p>11.4 - Multiplying and Dividing Rational Expressions <a href="#">Multiplying &amp; dividing rational expressions: monomials (video)</a></p> <p><a href="#">IXL   Multiply and divide rational expressions</a></p> <p>11.6 - Adding and Subtracting Rational Expressions <a href="#">Adding &amp; subtracting rational expressions: like denominators (video)</a></p> <p><a href="#">Intro to adding rational expressions with unlike denominators (video)</a></p> <p><a href="#">Add and subtract rational expressions</a></p> <p>11.8 - Rational Equations <a href="#">Solving Rational Equations</a></p> <p><a href="#">Solve rational equations</a></p>

**Instructional Adjustments:***Modifications/Student difficulties/Common errors:*

- Emphasize note taking strategies
- Use guided notes when necessary
- Revisit and study notebook
- Create vocabulary notecards
- Use tools/manipulatives/models
- Reword application problems
- Use handouts/graphic organizers
- Review peer work and provide feedback
- Complete error analysis process.
- Use Google Apps for Education
- Use supplemental programs such as:
  - Delta Math
  - Desmos
  - Discovery Education
  - EdPuzzle
  - Edulastic
  - Geogebra
  - iXL
  - Khan Academy
  - Math-Games
  - Math Planet
  - PurpleMath
  - Quia
  - Quizizz
  - Soft Schools
- Create a study guide for intervention
- Build a glossary notebook

*Online resources from textbook:*

- Investigation Animations
- Vocabulary Review Games
- Multilingual eGlossary
- Personal Tutor Interactive Videos
- Virtual Manipulatives
- Graphing Calculator Practice
- Foldables
- Self-Check Practice
- Chapter Resource Worksheets
- Word Problem Practice
- Enrichment Activities
- Online Self-Check Quiz
- 5-Minute Check Ins
