

Bethany Community School

Nutrislice App has arrived!

You can access your students menus from anywhere.

Download the Nutrislice app from your phone's App Store. Set up is easy and if you have a student at the middle or high schools, you can include that district as well.

You can view the menu, get nutritional information, and see pictures of the menu items. Bethany Community School, in partnership Chartwells, wants you to be informed of your child's breakfast and lunch options each day.

The Nutrislice app provides:

- ✓ More information about menu items, including nutritional information and photo
- ✓ Filters for common food allergens like nuts, wheat and dairy
- ✓ Available in Spanish as well
