

Screening Test Matrix by Age Cohort

Data	CDC Criteria Level's for In-Person School Screenings	Low Transmission Blue	Moderate Transmission Yellow	Substantial Transmission Orange	High Transmission Red
	Cases Per 100,000 (in Montgomery County)	0 - 9	10 - 49	50 - 99	≥ 100
	Positivity Rate (in Montgomery County)	< 5%	5% - 7.9%	8% - 9.9%	≥ 10%
Age	Toddler and Primary*	No Testing except for after Thanksgiving, Winter, and Spring Break	No Testing. The CDC does not recommend consistent testing for this age group because the emotional harm is greater than the added safety benefit. In addition, these students have the smallest class sizes on campus and spend the most time outside.		
	Lower Elementary*		No Testing.	Yes	Yes
	Upper Elementary*		No Testing.	Yes	Yes
	Middle and Upper School		Yes	Yes	Yes
	All full and part time Faculty and Staff		Yes	Yes	Yes
	All Essential Visitors (frequent Tutors, Coaches, etc)		Yes	Yes	Yes

*We can collaborate with the parents of Toddler, Primary, and Elementary families for parents who would prefer to work with their individual medical providers to do a saliva test instead of a nose swab. We know that the nose swab test can be difficult for some children.
