

Vaccinated Student Quarantine Policy

If your child is not fully vaccinated against COVID-19, they are subject to the main CDS COVID-19 Quarantine Policies. **Community Day School considers a person to be fully vaccinated against COVID-19 after receiving two doses of the vaccination, plus completing the waiting period of two weeks.** Please note that **if CDS has proof that your child has been infected with COVID-19 within 90 days of a classwide quarantine, that child will not be required to complete an additional quarantine and may instead return to school for in-person, on-campus learning.**

Community Day School must receive all COVID-19 test results via health@communityday.org.

If your child is fully vaccinated, the quarantine policy is as follows:

- After being informed of a COVID-19 positive in the classroom, a fully vaccinated student **does not need to quarantine** however he/she must return with a negative test taken on or after the date of classwide quarantine.
- If a student is fully vaccinated, but a person residing in their home tests positive for COVID-19, the student must quarantine at home for the duration of the other person's quarantine, then test negative before returning to campus. Please contact health@communityday.org to report this scenario and to receive return dates from our Health Team.
- If a student is fully vaccinated but tests positive for COVID-19, the student must follow the CDS quarantine policy for all individuals who test positive ([click here to learn more](#)).

Please contact health@communityday.org with any questions you may have.
