

Macbook Instructions

Step 1: Click on the WiFi icon. If necessary, turn WiFi on

Step 2: In the WiFi list, click on **wps-wlan** network to connect

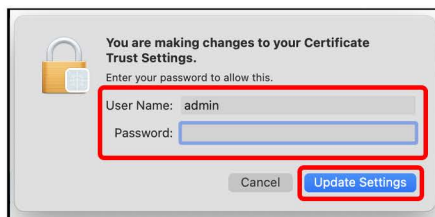

Step 3: Enter your **WPS username and password** in the appropriate fields. Leave "Mode" set to "Automatic," and ensure that "Remember this network" is checked. Click "Join"

Step 4: If it appears, verify the certificate by clicking "Continue"

Step 5: Enter your computer's admin Username and Password and then click "Update Settings"

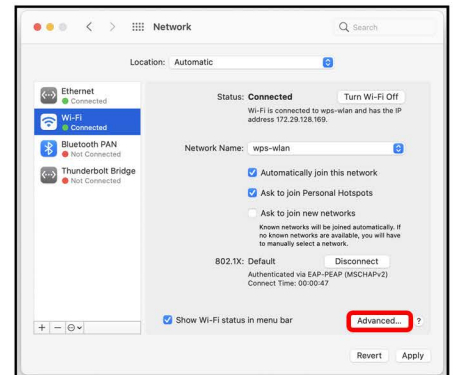

Step 6: Verify that you are connected to "wps-wlan" by clicking on the WiFi icon and observing the blue logo next to "wps-wlan"

Step 7a: If you have previously connected to "wps-guest" or "WPS WiFi Setup Instruction" click "Network Preferences..."

Step 7b: In the Network preferences window, click on the "Advanced" button

Step 7c: Remove any of the following networks if found: "wps-guest" or "WPS WiFi Setup Instructions" by selecting the name and then clicking on the "-" minus or dash button. After removing the network(s), click "OK," then "Apply"
