

Domestic Travel Protocols

Updated Information for Domestic Travelers

- Fully vaccinated travelers are less likely to get and spread COVID-19.
- Fully vaccinated people (with an FDA-authorized vaccine or a vaccine authorized for emergency use by the World Health Organization) can travel safely within the United States:
 - Fully vaccinated travelers do not need to get tested before or after travel unless their destination requires it.
 - Fully vaccinated travelers do not need to self-quarantine

Domestic Travel Recommendations for Fully Vaccinated People After Travel

- Self-monitor for COVID-19 symptoms; isolate and get tested if you develop symptoms.

Domestic Travel Recommendations for Unvaccinated People After Travel

- **Get tested** with a **viral test** 3-5 days after travel AND stay home and self-quarantine for a full 7 days after travel.
- Even if you test negative, stay home and self-quarantine for the full 7 days.
- If your test is positive, **isolate** yourself to protect others from getting infected.
- If you don't get tested, stay home and self-quarantine for 10 days after travel.
- Avoid being around people who are at **increased risk for severe illness** for 14 days, whether you get tested or not.
- Self-monitor for COVID-19 symptoms; isolate and get tested if you develop symptoms.

International Travel Protocols

Updated Information for International Travelers

Fully vaccinated travelers are less likely to get and spread COVID-19. However, international travel poses additional risks, and even fully vaccinated travelers are at increased risk for contracting and possibly spreading new COVID-19 variants.

CDC recommends delaying international travel until you are fully vaccinated.

If you are fully vaccinated with an FDA-authorized vaccine or a vaccine authorized for emergency use by the World Health Organization:

- You should continue to follow CDC's recommendations for traveling safely and get tested 3-5 days after travel.
- You do NOT need to get tested before leaving the United States unless your destination requires it.
- You do NOT need to self-quarantine after arriving in the United States.

International Travel Recommendations for Fully Vaccinated People After Travel

- Get tested with a **viral test** 3-5 days after travel.
- Self-monitor for COVID-19 symptoms; isolate and get tested if you develop symptoms.

International Travel Recommendations for Unvaccinated People

- **Get tested** with a **viral test** 3-5 days after travel AND stay home and self-quarantine for a full 7 days after travel.
- Even if you test negative, stay home and self-quarantine for the full 7 days.
- If your test is positive, **isolate** yourself to protect others from getting infected.
- If you don't get tested, stay home and self-quarantine for 10 days after travel.
- Avoid being around people who are at **increased risk for severe illness** for 14 days, whether you get tested or not.
- Self-monitor for COVID-19 symptoms; isolate and get tested if you develop symptoms.
