

COVID Cleaning Protocol

Outside Vendor Cleaning

- Cleaning schedule Mon-Fri after hours
- Increased cleaning of high touch areas: light switches, doorknobs, doors, railings
- Use of VIROCID, product designed to kill viruses
- Cleaning crew will wear masks and gloves
- Outside vendor will do mid-day cleaning of high touch areas
- Use of an electrostatic sprayer to be used for disinfecting and sanitizing

Additional Information

- All classrooms will be supplied with hand-sanitizers and disinfectant wipes.
- Additional hand-sanitizer stations are set up around campus near entrances and exits.
- Masks on at all times while indoors.
- All desks socially distanced
- Outdoor classroom areas
- Signage is being installed across campus to encourage social distancing both inside buildings and outside.

Air Quality

Using guidance from the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), the CDC and Building Operators and Managers Association (BOMA), we are implementing strategies to increase the fresh air flow, ventilation, and air exchange in campus buildings. We will encourage the circulation of fresh air by opening windows as much as possible.
