

What should you do if you are being bullied on social media?

If you are being bullied on Instagram, you should block them from your page, report them on Instagram, or simply just delete them. If the situation is deeper than that, you can delete the account you already have and make a new one that the person doesn't know about.

Good tips on how to prevent bullying on social media

1. Be private so not just anyone can follow you
2. Block people you feel threatened by
3. Show an adult if someone starts saying inappropriate things or does something that makes you uncomfortable
4. Delete hurtful comments
5. Report posts that are mean or inappropriate

What are the policies regarding inappropriate content?

If someone has posted something not cool or something that is inappropriate, then you can report the photo or video for inappropriate content.

What do you have to do to get something removed?

On Instagram people are able to tag you in pictures, and you can hit 'remove photo' and you will no longer be tagged. If you want a comment removed, click 'report inappropriate.' If you are still being bullied, hit 'block user' and they will no longer be able to access your account.
