

# Notes from February 5<sup>th</sup> Community Conversation Hosted by Sue Tanner

## SUCCESES

Breakdown silos between subject areas to generate successful learning eg. → Physics is applies math

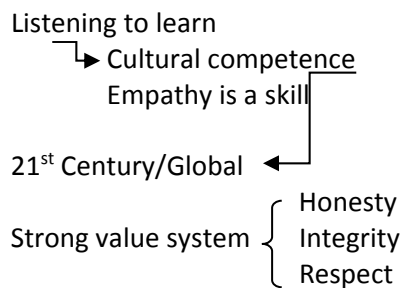

Immersive learning = More Creative  
Innovation  
World's future

Expose kids to what the world expects of them  
So they know what they want before college

Influence the state to change graduation requirements that reflect real life

## More Options to Fulfill Requirements (and Are These the Right Requirements –See State)

Bring community into schools

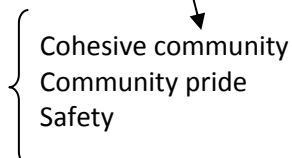

Get students out in community  
Help community understand  
Thank community  
District/community bonding  
Break stereo types

What's in it for the community?  
IREEAD – Discover differences and commonalities  
Less crime because of inclusion  
More honesty/better values  
Respectful community

Well behaved  
kids

Support of Schools

Investment in community  
Appreciated community

Better workers – Good doctors

Run our community

Give current students opportunities we had

Bring older citizens into community to discuss life skills and real world

Involve community

Community cohesive

Desire

Courage

Determination

Keep message going as a community

Online education seems like teaching kids to be a college student at a very young age

With STEAM<sup>2</sup> and classes like that, we're subcontracting our education to Butler Tech
