Troubleshooting

The Keenan Training System is a web-based program that is accessible with an Internet connection 24 hours a day, 7 days a week. The Training System is compatible with all recent versions of Google Chrome, Mozilla Firefox, Internet Explorer, Safari, iOS, and Android. Despite our optimal accessibility, occasionally users may experience difficulty loading their training. These issues are typically device-specific and can be resolved using the troubleshooting tips below.

If you are accessing training from a computer:

1. Restart your browser. On a Mac, you will need to fully quit the browser.
2. Make sure you are using a recent version of Google Chrome, Mozilla Firefox, Internet Explorer, or Safari. Chrome is the most effective. If you have any pending updates, they may need to be completed to move forward with training.
3. Clear your browser's cache which is typically located under your browser's history settings.
4. It is possible that device-specific browser extensions and/or pop-up blockers may be interfering with your training. Try accessing the training from another browser to rule out this possibility.

If you are accessing training from a mobile device:

Our system is compatible with many mobile devices. However, some users may have personal configurations that prevent certain courses from loading. Additionally, some custom and policy courses are best displayed on a computer. If you are experiencing difficulty loading our training on a personal device, try using a laptop or desktop computer.
