End of Report

AGENDA ITEM COVERSHEET

Item 6A. Waster Water Rate Increase

Submitted by: WPCA Superintendent Lynch

Date for Consideration: April 8, 2021

Town Attorney Review Required: No

Financial Summary:

Due to the rising costs associated with the running of the Putnam Wastewater Plant, we have found that it is necessary to increase the current rates for our commercial and industrial customers. Factors beyond our control, including increased labor, materials, and sludge processing expenses, have raised the cost of maintaining our facility.

Staff Recommendation:

Vote to approve the proposed rate increases for commercial and industrial customers.

Board Action Required:

Vote to approve the proposed rate increases for commercial and industrial customers.

Supporting Materials (if yes, list attachments):

CDM Smith memorandum Industrial Rates Summary

Memorandum

To: Elaine Sistare, Town of Putnam CT
Brian Lynch, Town of Putnam WPCA, CT
Mike Didato, Town of Putnam WPCA, CT

From: Joseph Ridge, CDM Smith

Date: February 9, 2021

Subject: Industrial Rates Summary

Overview

The Town of Putnam Water Pollution Control Authority (the "WPCA") has requested that CDM Smith Inc. (CDM Smith) review the WPCA's current charges to the four long-term industrial customers to determine the appropriateness of these charges. This review is based on data provided by the WPCA and not the conduct of a detailed cost of service analysis. However, we believe that the results are reasonable and provide the WPCA sufficient information to make some policy decisions on how to best proceed. Note that while the Town of Pomfret's has been recently placed online, and is considered the fifth industrial customer, there is no historical data regarding flowrates and characteristics.

Our evaluation is based on the WPCA's budget information for the past three years and a range of industry standard cost of service factors plus the results of some recent comparable work. The cost of service factors allocates the total budget (or actual expenditures) into groupings related to the cost to transport, treat and discharge wastewater flow, BOD and TSS. Based on that preliminary assessment, it appears that the four current industrial customers (International Paper, Pall Corporation, Wheelabrator Corporation, and the Town of Woodstock) are paying less than that suggested by a high-level cost of service evaluation. In the past year, they paid a total of \$437,200, but based on recent flow and load data, their allocated costs for services provided ranges from \$606,000 to \$710,000 depending on the cost factors used.

This assessment is based on industry standard cost factors and not a complete cost of service evaluation.

Recommendations

Based on our analysis, we recommend that the WPCA increase its rates for industrial customers as follows:

Flow: \$1,681.87 per mg	Currently \$2,382.25/mg
BOD: \$0.9189/lb	Currently \$0.4846/lb
TSS: \$0.4651/lb	Currently \$0.3043/lb

The Putnam WPCA's intermunicipal agreement with Woodstock and Pomfret sets the rates to those communities as the industrial rates plus a 15 percent surcharge. The Woodstock and Pomfret, with the 15% surcharge the rates are:

Flow	\$1,934.15
BOD	\$1.0568
TSS	\$0.5348

Based on the 2019 data, we have that would increase revenues from the surcharged entities to approximately \$700,000. As you recall, the flow and load data used for this analysis does not include flow and loads from Pomfret so assuming no other changes from the 2019 data, the expected revenue will be higher than that with the addition of Pomfret data.

Approach and Methodology

CDM Smith has followed the following approach to develop these results:

- The WPCA provided budgetary information for the past three years. Our analysis was run against FY 2021 data and is based on the total wastewater budget.
- Cost of service factors from industry sources (Water Environment Federation (WEF) guidance) and recent relevant CDM Smith projects were applied against that budget data to estimate the costs of transporting, treating and disposing of wastewater flow, BOD and TSS.
- The WPCA provided recent quarterly data on the total flow and loads at the wastewater treatment plant, as well as the contributions from the four industrial customers. Based on that flow and load data, we calculated the costs that are "caused" by the four industrial customers. So, for example, if the customers represented 30 percent of the flow to the plant, then they should be allocated 30 percent of the costs identified for flow.
- Finally, we compared the total costs of service identified for the four industrial customers with their invoicing for the past four years.

The WPCA provided total flow and load data for the wastewater plant and also for the four industrial customers. Based on that data, the four industries account for 24.1 percent of plant flow, 37.8 percent of BOD (measured in pounds) and 16.0 percent of TSS (also in pounds). To determine the four industrial customer's shares of cost of service, we applied those percentages to the costs.

The four industrial customers cause the WPCA to incur between \$605,000 and \$713,000 in wastewater treatment costs, between 23 and 27 percent of the WPCA's total wastewater expenses. In the past year, the four industries have been invoiced for a total \$437,000 significantly less than the estimated costs of service. To eliminate the apparent subsidization from other users, the rates charged the four customers should be increased.

This is based on industry standard cost factors and before the WPCA were to undertake rate increases of this magnitude, we believe that a cost of service evaluation based on the actual

Town of Putnam CT DPW

February 9, 2021

Page 3

costs of operating the various components of the WPCA's wastewater system should be undertaken. We also believe that it is important to recognize that shifting approximately \$200,000 to \$300,000 in costs from all other customers to the four long-term industrial customers would allow consideration for modifications or more likely stabilization of current sewer rates for residential users.
