White Lustrium A non-precious metal alloy that is silver in color; it is a hard and durable metal.

SunCast Same characteristics as White Lustrium, but yellow in color because of coating with 23 karat yellow gold.

Silver Elite A precious metal alloy primarily composed of silver with elements of palladium and gold, coated with a rhodium plating.

Solaris Elite This radiant yellow metal alloy is beautiful and affordable. We've combined durability and affordability to create our exclusive yellow alloy.

10K Gold A precious metal that will stand the test of time and will always have value. Yellow or white in color. Also available in 14K and 18K --- the higher the karat, the higher the percentage of gold in your ring.

“ We start with the best. Before we even begin to craft your ring, our jewelers start by selecting only the finest raw metals and stones. All of the metals that we use in our rings are derived through sources you can trust and are backed by a Lifetime Limited Warranty. ”
