

# Student BYOD Printing

1. Save the document as a PDF.
2. Open a web browser and goto <https://ps02/cps/>

If you see the following notice: Click **Advanced**

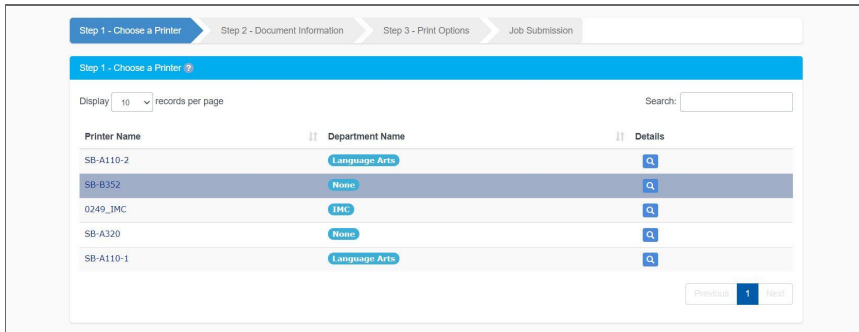

Then click **Proceed to ps01 (unsafe)**

3. Click on the **Print** icon in the middle of the page.

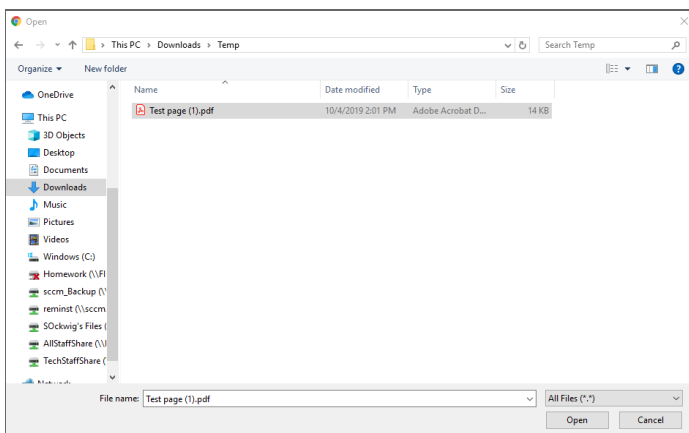

4. Click on the **Printer Name** that you would like the document to print from.

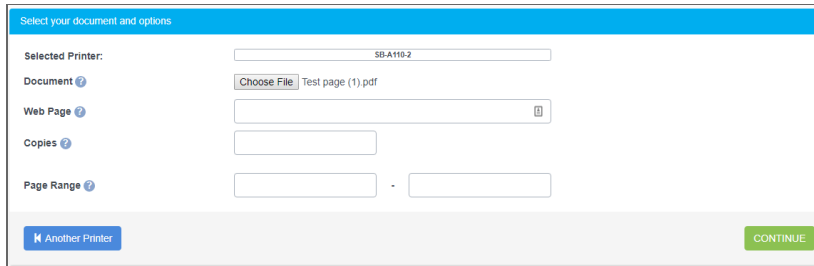

5. Click on the **Choose File** button on the Document Information page.

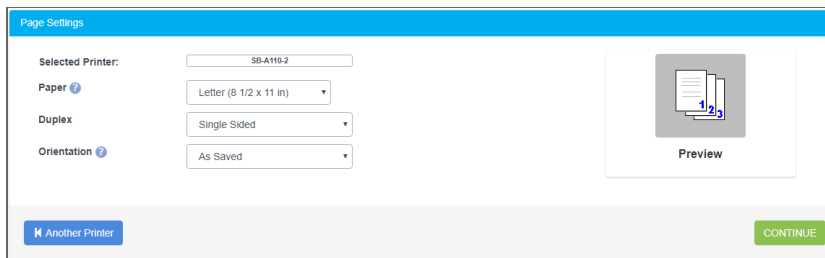

6. Browse to find the PDF file of the document that was saved on Step 1 and click on **Open**.

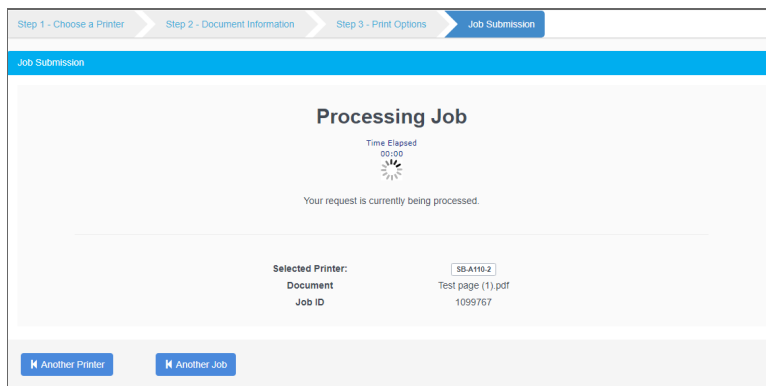

7. Click on **Continue**.

8. On the Print Options page everything can be left as default; click on **Continue**.

9. Wait while your print job is processed and placed into the print queue.

10. Your job has printed and is at the printer when the completed page is displayed. This can take several minutes if there are a large number of print jobs in the queue.
