

PERINATAL SUBSTANCE USE TOOLKIT

Provider resources and tools to assist in screening for perinatal substance use disorders.

YOU CAN MAKE A DIFFERENCE!

Evidence suggests that simply asking about alcohol and substance use may result in behavior change. Discussing substance use in detail may increase a woman's awareness of her actual consumption and may also lead to modified behavior.

This toolkit provides education, guidance, and resources related to screening and treatment for perinatal substance use disorders for patients and providers. Access the toolkit by visiting bit.ly/KDHE_Toolkits. The toolkit includes:

Templates for Local Use

- > Screening Office Procedures and Policy
- > Sample MOU for Community Partners

Provider Resources

- > KanCare Services reimbursement information
- > Implementation Resources
- > Identifying Treatment Options in KS

Patient Resources *(English and Spanish)*

- > Health risks associated with substance use
- > How to access treatment
- > Resources related to specific drug use during pregnancy

Workflows & Screening Tools

- > SBIRT
- > Referral Access Point
- > ASSIST and NIDA Quick Screen
