Tips & Strategies for the ACT Test

This collection of Tips & Strategies will help you get your best possible score on the ACT Test.

▾ Quick start guide for ACT Academy

You are in charge of your own study path. You can choose what you want to do each day, and each day what you choose can be a bit different. From the Dashboard page, you can choose which subject you want to practice, then click **Explore** under that subject. On the pop-up, you can choose it to go straight into some videos and games by clicking **Get Resources**, or better yet, start with a quiz! The advantage of taking a quiz is that your score will tell us a little more about you and the areas where you need help. We will be able to suggest videos and games that are personalized to your needs. Any time you take a quiz or take the full-length practice ACT test, the videos you see under the Resources tab will be updated!

You can find suggested quizzes on the **Resources** tab, and the full list of all the available quizzes on the **Progress** tab. This is also the tab where you can find all your scores, and review your answers that will have attached videos for each wrong answer. The **ACT Practice Test** tab will give you a score like the real ACT. Feel free to take any of these quizzes as many times as you want for practice.

On the **Dashboard** tab, you'll also find a sample study plan to help you brush up on all the different reporting categories. Each day in the schedule will focus on a different subject, and once you complete all the resources for that day, it will disappear so you can move on.

If you have already taken the ACT or PreACT, you can enter your results on the **Dashboard** tab as well. This will tailor the **resources** that you see under the Resources tab so you can focus on only the areas you need help in!

And of course, we are constantly adding new resources and more quizzes and practice tests, so check back and come study often!
