

Private institutions are approved by Københavns Kommune according to Dagtilbudsloven (Law of daycare) §20 with another language than Danish (§22a).

According to this, private institutions can be established, where the main language is either English, French or German, if after specific evaluation it is estimated not to have any consequences on the integration. In Københavns Kommune it is emphasized that the citizens are in Denmark for a shorter period.

The information in the form is gathered for the purpose of the private institution to make a specific evaluation of eventual consequences of integration, and secure that the institution by enrolling the children, is meeting the requirements of Dagtilbudslovens §22a, and the approval of the institution by the Kommune.

Regarding the above mentioned purposes, and as part of the Kommunes supervisory task, the institution will pass this information to Børne- og Ungdomsforvaltningen (Child and Youth Management) in Københavns Kommune.

The child:
