

Resources on Mental Wellness and Racial Trauma

“Racial trauma, a form of race-based stress, refers to People of Color and Indigenous individuals’ (POCI) reactions to dangerous events and real or perceived experiences of racial discrimination. Such experiences may include threats of harm and injury, humiliating and shaming events, and witnessing racial discrimination toward other POCI. Although similar to posttraumatic stress disorder, racial trauma is unique in that it involves ongoing individual and collective injuries due to exposure and reexposure to race-based stress.”
