

MINOOKA CCSD 201

COVID Mitigation Plan *2021/2022 School Year*

Minooka CCSD 201 will closely monitor the impact on COVID-19 related health issues in our schools and surrounding areas and may change the mitigation factors in place to ensure the safety of students and staff.

TABLE OF CONTENTS

Inspire learners to be responsible, confident and successful.

Minooka's Commitment to Our Community

Minooka CCSD 201 is dedicated to ensuring that all instruction, either in-person or remote, will be relevant and meaningful. All students deserve to be challenged and engaged in learning each day, in a safe, supportive environment. This school year, regardless of which learning model your child selects, they will be taught content every day that aligns with Minooka CCSD 201's curriculum.

The following will be the same across all learning environments and schools:

- All students will have the same grading structures.
- All schools will take attendance.
- All classes will use similar, District approved learning materials, texts, and instructional technology.
- All students will get appropriate support and services through the general education program, special education, Individualized Educational Plans, 504 plans, Advanced Placement, Multi-Lingual Programming, and Multi-Tiered System of Supports.
- All students will have access to social-emotional support, as needed.
- All schools will focus on establishing effective relationships and community.

Inspire learners to be responsible, confident and successful.

General Overview of Plan

All schools will reopen using social distancing guidelines where possible and with face masks/coverings mandate for all staff and students, regardless of vaccination status.

- Student and Staff safety is paramount. All IDPH/ISBE guidelines will be followed to ensure our facilities are safe and the students and staff are protected.
- The district will monitor local and district COVID numbers to ensure staff and student safety.
- Remote instruction will be offered to students that are at increased risk of severe illness, have special health care needs, or live with someone who is at increased risk of severe illness.
 - Families choosing this option would be committing for an entire academic semester.
- School District Officials will continuously monitor the local health metrics to determine movement to the next or previous stage of instruction. With consideration of metrics & recommendations for ISBE, IDPH, and the CDC.

Communication

Methods of Communication

The primary method of mass communication of information to our families will be through the SchoolMessenger system, which can broadcast phone, email and SMS text messages to our families. Where appropriate, messages will be sent in both English and Spanish. Parents that need to change contact information after they have completed registration should contact their school office for assistance.

Parents, students and community members can also access much information on our website, www.min201.org, which is smartphone enabled. Our website will be updated often as more details are developed for our return to school and is the best avenue for the most current information.

We also have a smartphone app which can be found in most searches as “Minooka School District 201,” and we regularly share our information on social media platforms such as Facebook.

Inspire learners to be responsible, confident and successful.

Operational Plans

Maintaining Social Distancing

All schools and facilities are taking actions to ensure all campus spaces support health and safety. These actions include signage and floor markings to remind students of social-distancing practices. There may be some changes to foot-traffic flow through buildings and furniture placement in the classrooms. Students with disabilities and employees who work with them are expected to practice social distancing when possible.

Classroom seating will be configured with maximum allowable space in between students as possible.

- Where possible, desks will face the same direction and/or students will sit on only one side of tables, spaced apart, in assigned seats.
- Students will not share school supplies; students will use their own school supplies and keep belongings separate or in their backpacks during the day.
- Students are encouraged to bring a refillable water bottle from home to school. Bottles may be refilled throughout the day using a sink. School drinking fountains will be shut off.
- Hand sanitizer will be readily available in each classroom and students will be given time to thoroughly wash hands with soap and water several times throughout the day.
- All classrooms will have disinfectant spray sanitizer available for staff and students to disinfect high touch areas as needed throughout the day.

Handwashing

The CDC recommends everyone wash their hands often with soap and water for 20 seconds. Schools will be incorporating handwashing breaks into the school day and reinforcing handwashing during key times throughout the school day. If your child has sensitivities to hand sanitizer, please communicate this with your child's teacher so they can provide your child other opportunities to clean their hands. Hand-Sanitizing Station/dispensers will be provided in each classroom and readily available throughout all buildings.

Inspire learners to be responsible, confident and successful.

Face Masks

Face masks for unvaccinated individuals are the most effective measures to prevent transmission of COVID-19. Masks/face covering are required to be worn by all individuals (age two or older) while in Minooka 201 facilities, regardless of vaccination status. Masks must be worn at all times while on Minooka 201 transportation.

Minooka CCSD 201 will closely monitor the impact on COVID-19 related health issues in our schools and surrounding areas and may change the mitigation factors in place to ensure the safety of students and staff. Additional information on face coverings can be found on the [ISBE website](#).

Face coverings should be replaced or washed after each use. According to CDC guidelines, cloth face coverings can be machine washed with regular laundry detergent at the warmest appropriate water setting. Cloth face coverings can also be hand washed by soaking for 5 minutes in solution of 5 tablespoons (1/3 cup) household bleach per gallon of room temperature water; rinse thoroughly with water. Machine dry at the highest heat setting or air dry in direct sunlight.

Lunches

Students will be physically distanced as much as possible within the lunch rooms. Staff and students should refrain from direct physical contact.

Lockers/Locker Rooms

Hallway and locker room lockers will not be utilized. Students will not be changing into Physical Education uniforms at this time. Students at the elementary schools will utilize cubbies on a rotating schedule to allow for social distancing.

Custodial Services/Cleaning and Sanitizing

Minooka CCSD 201 has improved ventilation and added enhanced filtration systems throughout all learning spaces to reduce the concentration of potentially virus-containing droplets in the schools' indoor air environments. Enhanced, daily cleaning protocols have been implemented including the following:

- Cleaning and disinfecting student desks/chairs.
- Main touchpoints will be cleaned and disinfected (switches, handles, doors).

Inspire learners to be responsible, confident and successful.

- Bathroom touchpoints will be cleaned and disinfected on scheduled intervals throughout the school day.
- Additional disinfecting throughout the school day to the following
 - Push bars
 - Door handles
 - Soap/Sanitizer dispensers
 - Partition doors (inside and outside of doors)
 - Toilet seats
 - Flush handles- urinals & toilets
 - Hand dryer push buttons
 - All faucet handles in restrooms
 - All sink handles in classrooms, lounges, etc
 - Handrails
 - Main Office countertops
- Staff will use disinfecting sanitizer between students using common spaces.
- Students sanitize &/or wash hands throughout the school day.
- Disinfect back of chairs.
- Attempt to spend less time on carpet/floor to help eliminate germs (hard surface to disinfect).

After School Cleaning Process

- Confirm proper dwell time is used for disinfectant on all areas discussed above
- Deeper clean/disinfect to chairs and desks
- Deeper clean/disinfect to all classroom countertops, lounge tables, lounge counter tops, sinks, toilets, urinals
- Deeper clean to all dispensers, partition walls, restroom doors, office doors, etc
- Detailed Cleaning (days with no student attendance)
- All touchpoints in the building will be cleaned and disinfected.
- Deep cleaning to restrooms throughout the facility
- Additional deep cleaning and disinfecting will be done in classrooms.
- Conduct a thorough cleaning of all surfaces discussed to remove any and all disinfectant residue off all surfaces.

Inspire learners to be responsible, confident and successful.

Transportation

Minooka CCSD 201 strongly encourages all families that are able to drive their students to and from school. All students and staff must wear face masks while on buses. Social distancing will be maintained where possible while on the buses and students will have assigned seats. Students must undergo symptom and temperature self-certification prior to loading the bus from home.

Students who use bus transportation can expect clean and sanitized buses. All Minooka 201 buses will be cleaned and sanitized four times per day following each bus route. An EPA registered disinfectant will be used on all hard surfaces including the fronts and backs of seats and handrails. All buses will have hand sanitizer located at the front of the bus that students may utilize upon entering and exiting the bus. The first row of seats will be left vacant in order to provide appropriate social distance to the bus driver along with a space for any student that becomes symptomatic while riding the bus. Weather permitting, the roof vents and windows will be opened to maximize ventilation. All students and staff must wear face masks while on buses.

Recess & Playgrounds

Buildings will begin holding recess as scheduled by building administrators.

Athletic and Extracurricular Activities, Band, & Chorus

The athletics department is continuing to monitor all information per IESA, ISBE, IDPH, IHSA, and the CDC as there have been many updates over the past year. The district will continue to evaluate how athletics/extracurricular activities will proceed following Operational Health and Safety protocols as they are updated. Athletics/extracurricular

Inspire learners to be responsible, confident and successful.

activities will begin in 2021, as they have in the past with competitive tryouts. competing against other schools and participating in the IESA tournament(s). Each activity will follow current procedures similar to the expectation for the school day.

- The athletic department does not have a masking mandate or policy enforcing the decision for a student or coaches to wear or not wear a mask while in person at school for practice or competition.
- Masks are required by all individuals while on the bus
- Masks are required for all individuals during indoor athletics and activities
- The district will not tolerate the bullying of individuals for wearing or not wearing a mask.

As we continue to plan for a return to school, we are communicating with the Minooka 201 administration about possible updates to any or all current practices. This information is subject to change per updates from Minooka 201, IESA, IDPH, CDC, and/or ISBE.

Before and After-School Programs

Minooka CCSD 201 continues to partner with the Greater Joliet Area YMCA to provide before and after school care options for our families at our elementary buildings and Minooka Intermediate School. Interested families can access more information at the [Galowich Family YMCA Kid Care website](#).

Visitors to the Buildings

In an effort to protect the health and safety of our community, only essential visitors will be allowed on school campuses to minimize the number of people on-site. No outside guests will be allowed to visit the classroom. All efforts will be made to keep necessary visitors to a minimum, including the use of virtual or telephone meetings with families and guests. Parents meeting on-site with school staff must follow social-distancing guidelines and wear facemasks when appropriate.

Inspire learners to be responsible, confident and successful.

Remote Learning Academic Supports

Full Remote Learning Track

Remote instruction will only be offered to students that are at increased risk of severe illness, have special health care needs, or live with someone who is at increased risk of severe illness. Families choosing this option would be committing for an entire academic semester. Returning to in-person instruction would not be allowed prior unless a significant life event occurred or until the emergency declaration has been removed.

- Remote learning will be completely asynchronous through an online learning platform contracted through the District.
- Remote curriculum will closely resemble the major standards of the core curriculum of Minooka 201.
- Special education services will be determined based on student need through a meeting with the child's special education team.
- If a student's life situation changes and Remote Learning may be warranted, family should contact the building principal.
- Students are able to participate in extracurricular activities, with appropriate medical documentation.

Learning While on Quarantine

While on Quarantine, students will be given a link to join virtual lessons and will be expected to complete any missed work from the classroom. Classroom teachers will utilize a virtual learning platform such as Google Classroom or Schoology to share assignments and lessons.

- Special education services will be determined based on student need through a meeting with the child's special education team.
- While on quarantine or isolation, students will not be able to participate in in-person extracurricular activities.

Inspire learners to be responsible, confident and successful.

Health and Wellness

Student and Staff health and wellness is paramount and as such, children and staff are encouraged to remain at home if they are displaying any symptoms on the CDC COVID-19 Symptoms list.

GUIDELINES FOR IDENTIFYING STUDENTS OR STAFF WITH COVID-19 SYMPTOMS

One or more of the following symptoms:

- Fever (100.4 F or higher without fever reducing medication)
- New onset of moderate to severe headache
- Shortness of breath
- New cough
- Sore throat
- Vomiting
- Diarrhea
- New loss of sense of taste or smell
- Fatigue from unknown cause
- Muscle or body aches from unknown cause

Exposure in the past 14 days:

- Close contact with an individual diagnosed (positive test) with COVID-19
 - Close contact: within 3 feet (masked) or 6 feet (unmasked) for a cumulative 15 minutes or more with or without a mask while the individual was infectious. The infectious period begins 2 days before the onset of symptoms or 2 days before the positive sample was obtained for an asymptomatic person.

Inspire learners to be responsible, confident and successful.

Procedures if a student/staff member is exhibiting symptoms of COVID-19

- A student or staff member will immediately report to the school nurse/isolation room.
- Parents will be contacted to pick up their child within an hour.
- If there is an immediate serious concern regarding the individual's health, 911 will be called.
- A staff member or parent will be recommended to contact their healthcare provider to see if testing is needed. Staff members are required to report test results to the school. Parents will be recommended to report test results to the school.
- All areas used by a person that is sick will be cleaned and disinfected before further use.
- All students who had contact with a student or staff member (15 minutes or longer within 3 feet (masked) or 6 feet (unmasked)) who is suspected of having COVID-19 or tests positive for COVID-19 will also be sent home to monitor for symptoms. See below for timelines.
- The school/district will report any case of confirmed COVID-19 to local health departments, staff, and school families.
- Unvaccinated household members of an individual with suspected COVID-19 symptoms must follow quarantine timelines unless the ill household member is tested within 24 hours of symptoms. If testing does not occur within 24 hours, unvaccinated household members must be excluded from school. Pending test results, household members can remain in school with consistent use of masks. Household members may not remain in school pending testing if there is a high suspicion the ill household member has COVID-19 (i.e. they are a known close contact, they have lost taste and smell).

Guidelines for Returning to School Following Exposure or Symptoms

Individuals who were symptomatic with no exposure to a positive case with a negative Antigen or PCR COVID-19 test (Home/over-the-counter COVID-19 tests are not acceptable) can return to school

- Following existing school illness management policies

Individuals who have tested positive for COVID-19 can return to school

- 10 days after symptoms first appear or 10 days after positive test if asymptomatic

Inspire learners to be responsible, confident and successful.

- Fever free for 24 hours without the use of fever-reducing medications
- Vomit/Diarrhea free for 48 hours
- Other symptoms of COVID-19 are improving

Unvaccinated members of the positive individual's household are required to quarantine according to local health department requirements.

Contact tracing will be utilized within the schools as required per CDC and IDPH guidelines. Minooka CCSD 201 health and administrative staff will work with local health departments to follow quarantine and isolation guidelines. Close contacts are considered someone within 3 feet (masked) or 6 feet (unmasked) of a positive case.

Vaccinated individuals and those with documented COVID-19 infection within the past 90 days with no symptoms will not be required to quarantine when considered a close contact.

However, fully vaccinated individuals who have a known exposure to someone with suspected or confirmed COVID-19 should be tested 3 to 5 days after exposure and must continue to comply with universal indoor masking requirements.

CDC guidance now states that unvaccinated individuals with positive SARS-CoV-2 antibody testing within three months prior to, or immediately after, an exposure to someone with suspected or confirmed COVID-19 and who have remained asymptomatic since the current COVID-19 exposure do not need to be quarantined.

Timelines for individuals who are unvaccinated, not fully vaccinated, or without a COVID diagnosis in the last 90 days that are Close Contacts:

- Quarantine for at least 14 calendar days from the last date of exposure if student/staff not masked at exposure. Date of exposure is considered Day 0.
- Quarantine for 10 calendar days from the last date of exposure if student/staff masked at exposure when
 - No symptoms are present
 - The individual can maintain physical distancing AND masking at all times (3 to 6 feet)
- Quarantine for 7 calendar days from the last date of exposure if student/staff masked at exposure when
 - No Symptoms are present
 - SARS-COV-2 PCR testing demonstrates a negative test within the last 48 hours of exposure day 7 (starting day 6 or after).

Inspire learners to be responsible, confident and successful.

- The individual can maintain physical distancing AND masking at all times (3 to 6 feet)

*Quarantine requirements are determined by the Illinois Department of Health; as requirements are updated through IDPH, additional features will be added to Minooka 201's plan.

Test to Stay Methods:

Once deemed close contact, a non-vaccinated individual can test on days 1, 3, 5, & 7 using the following methods to remain in the school environment. Test to Stay can be completed through SHIELD Testing or BinaxNOW testing through the District. Parents must complete an opt-in consent to allow their student to participate in Test to Stay.

- If an individual is deemed a close contact and not fully vaccinated AND already has completed the opt in process, the school will begin testing immediately and contact parents with the result.
 - SHIELD Testing: students may return to classroom while awaiting the results. If a positive result is received, the student will be removed from the learning environment and parents will be notified of the timeline of isolation.
 - BinaxNOW Testing: students may return to classroom after the 15 minute waiting period, if negative results are received. If positive, school will contact parent with the timeline of isolation.
- Test to Stay is not allowable for household members of a positive case, as the individual would have repeated exposure to the positive case.

[Additional Details on Testing Options can be found here.](#)

Outbreak Testing:

If an individual, regardless of vaccination status, has been exposed through an environment that is deemed an outbreak by the local health department, the individual may participate in Outbreak Testing as detailed below:

- Testing must occur twice weekly
- Testing must continue for two incubation periods (28 days from outbreak exposure with no new cases from outbreak environment).
- Testing must be conducted by school or results must be shared with school.

Inspire learners to be responsible, confident and successful.

Additional Notes for Close Contacts

If students/staff are exposed to a confirmed case ONLY while outside, they are not considered a close contact whether masked or unmasked if exposure remains outside only.

Individuals with documentation of COVID-19 infection within the past 90 days (positive diagnostic test based on specimen collection date) are exempt from testing and quarantine as long as they remain asymptomatic

It is recommended that any close contact complete daily symptom monitoring through 14 calendar days after exposure. If symptoms develop, the individual should immediately self-isolate.

Antibody Testing

Unvaccinated individuals with positive SARS-CoV-2 antibody testing within three months prior to or immediately following exposure to a positive case and are asymptomatic are not required to quarantine.

[CDC When You Can be Around Others after You Had or Likely Had COVID-19](#)
[CDC Quarantine Scenarios If You Might Be Sick](#)

Guidelines For Closure of Schools (Based on IDPH Guidelines)

For any positive COVID-19 case at a school in Minooka CCSD 201 Schools, district and school leadership teams will work with local officials from the Department of Health and Center for Disease Control in determining a course of action on a case-by-case basis. It is recommended from the Illinois Department of Public Health that all students and staff sent home with COVID-like symptoms should be diagnostically tested. Students and staff should remain home from school until they receive the test results.

Important Definitions: This information was collected from the Illinois State Board of Education and Illinois Department of Public Health:

Inspire learners to be responsible, confident and successful.

Quarantine - This is used to separate people who are in close contact of someone with a contagious disease, such as COVID-19, from others for a period of time (14 calendar days for COVID-19) to see if they become sick.

Isolation - The act of remaining at home or a place where a person was told to isolate and avoid contact with other people until their isolation period is over. Isolation is recommended for those who are sick with symptoms of COVID-19 and have tested positive or are waiting on results of a test.

Close Contact - This is defined as being within 3 feet (if both are masked) or 6 feet (if masks are not used) of someone who tested positive for COVID-19 for 15 minutes.

Inspire learners to be responsible, confident and successful.

Student Services and Support

Students with Special Needs (IEP/504)

Students with special needs will continue to have access to their services through either in person instruction or remote instruction.

Evaluations for special education services can be completed in person. Special Education teams at each building will contact families to set up evaluations that are to be completed. Contact building administration if you have specific questions about special education services.

Multi-Lingual Programming

Students qualifying for English Language support will continue to receive support through either in person instruction or remote learning. Specific information on these services can be obtained by contacting building administration.

Multi-Tiered System of Supports

Students will have access to tiered instruction through either in person instruction or remote instruction. A focus will be to provide interventions within the child's environment through differentiated instruction and individualized interventions.

Social-Emotional Supports

Social-Emotional Learning and Social-Emotional Supports will be available to students through either in person instruction or remote instruction. Additional information Social-Emotional Supports can be obtained from building social workers and counselors.

Inspire learners to be responsible, confident and successful.

Self Certification Checklist

Yearly Self Certification

I certify that I will not send my child to school if any of the following are true:

- My child is experiencing one or more of the following symptoms:
 - Fever (100 F or higher without fever reducing medication)
 - New onset of moderate to severe headache
 - Shortness of breath
 - New cough
 - Sore throat
 - Vomiting
 - Diarrhea
 - New loss of sense of taste or smell
 - Fatigue from unknown cause
 - Muscle or body aches from unknown cause

I certify that I will not send my child to school if the following is true

- My unvaccinated child is considered a close contact to a COVID-19 positive individual within the last 14 days.
 - Close contacts are considered someone within 3 feet (masked) or 6 feet (unmasked) of a positive case.
 - Vaccinated individuals and those with documented COVID-19 infection within the past 90 days with no symptoms will not be required to quarantine when considered a close contact.

*Note: If our child is experiencing any of the listed symptoms, please call the school to report your child's absence including specific symptoms or COVID-19 exposure. Please contact the school nurse for return-to-school guidance. If your child's symptoms worsen, contact your healthcare provider.

Inspire learners to be responsible, confident and successful.

FACT SHEET FOR PATIENTS

University of Illinois Office of the Vice President for Economic Development
and Innovation
covidSHIELD

Updated: April 2, 2021

Coronavirus
Disease 2019
(COVID-19)

You are being given this Fact Sheet because your sample(s) was tested for the Coronavirus Disease 2019 (COVID-19) using the covidSHIELD.

This Fact Sheet contains information to help you understand the risks and benefits of using this test for the diagnosis of COVID-19. After reading this Fact Sheet, if you have questions or would like to discuss the information provided, please talk to your healthcare provider.

For the most up to date information on COVID-19 please visit the CDC Coronavirus Disease 2019 (COVID-19) webpage:

<https://www.cdc.gov/COVID19>

What is COVID-19?

COVID-19 is caused by the SARS-CoV-2 virus which is a new virus in humans causing a contagious respiratory illness. COVID-19 can present with a mild to severe illness, although some people infected with COVID-19 may have no symptoms at all. Older adults and people of any age who have underlying medical conditions have a higher risk of severe illness from COVID-19. Serious outcomes of COVID-19 include hospitalization and death. The SARS-CoV-2 virus can be spread to others not just while one is sick, but even before a person shows signs or symptoms of being sick (e.g., fever, coughing, difficulty breathing, etc.). A full list of symptoms of COVID-19 can be found at the following link: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>.

What is the covidSHIELD?

The test is designed to detect the virus that causes COVID-19 in saliva.

Why was my sample tested?

You were tested because:

i) Your healthcare provider believes you may have been exposed to the virus that causes COVID-19 based on your signs and symptoms (e.g., fever, cough, difficulty breathing), and/or because:

- You live in or have recently traveled to a place where transmission of COVID-19 is known to occur, and/or
- You have been in close contact with an individual suspected of or confirmed to have COVID-19.

ii) You are undergoing serial testing even though you do not have symptoms or risk factors for COVID-19

Testing of the samples will help find out if you may have COVID-19.

What are the known and potential risks and benefits of the test?

Potential risks include:

- Possible discomfort or other complications that can happen during sample collection.
- Possible incorrect test result (see below for more information).

Potential benefits include:

- The results, along with other information, can help your healthcare provider make informed recommendations about your care.
- The results of this test may help limit the spread of COVID-19 to your family and those you come in contact with.

What does it mean if I have a positive test result?

If you have a positive test result, it is very likely that you have COVID-19. Therefore, it is also likely that you may be placed in isolation to avoid spreading the virus to

- **Where can I go for updates and more information?** The most up-to-date information on COVID-19 is available at the CDC General webpage: <https://www.cdc.gov/COVID19>. In addition, please also contact your healthcare provider with any questions/concerns.

FACT SHEET FOR PATIENTS

University of Illinois Office of the Vice President for Economic Development
and Innovation
covidSHIELD

Coronavirus
Disease 2019
(COVID-19)

Updated: April 2, 2021

others. You should follow CDC guidance to reduce the potential transmission of disease.

There is a smaller possibility that this test can give a positive result that is wrong (a false positive result) particularly when used in a population without many cases of COVID-19 infection. Your healthcare provider will work with you to determine how best to care for you based on the test results along with medical history, and your symptoms

What does it mean if I have a negative test result?

A negative test result means that the virus that causes COVID-19 was not found in your sample.

However, it is possible for this test to give a negative result that is incorrect (false negative) in some people with COVID-19. You might test negative if the sample was collected early during your infection. You could also be exposed to COVID-19 after your sample was collected and then have become infected.

This means that you could possibly still have COVID-19 even though the test result is negative. If your test is negative, your healthcare provider will consider the test result together with all other aspects of your medical history (such as symptoms, possible exposures, and geographical location of places you have recently traveled) in deciding how to care for you.

It is important that you work with your healthcare provider to help you understand the next steps you should take.

What is serial testing?

Serial testing is when a single person is tested for COVID-19 more than once in a relatively short period of time. Because the amount of virus in your sample may change over time and false results may occur, repeated testing may identify more individuals with COVID-19 than a single test. By repeating testing, it may be possible to more quickly identify cases of COVID-19 and

reduce spread of infection. Additional testing may be necessary, depending on your individual risk factors and test results.

Is this test FDA-approved or cleared?

No. This test is not yet approved or cleared by the United States FDA. FDA may issue an Emergency Use Authorization (EUA) when certain criteria are met, which includes that there are no adequate, approved, available alternatives. The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19. This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

What are the approved alternatives?

Any tests that have received full marketing status (e.g., cleared, approved), as opposed to an EUA, by FDA can be found by searching the medical device databases here: <https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/medical-device-databases>. A cleared or approved test should be used instead of a test made available under an EUA, when appropriate and available. FDA has issued EUAs for other tests that can be found at: <https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization>.
