## JUNIOR SCHOOL

### JS ACCESS ARRANGEMENTS

This access plan has been made with consideration for persons with sight loss, hearing or mobility impairment.

**Sight loss** is very individual. People who are blind or partially-sighted have varying degrees of sight loss, ranging from those who have no light perception at all (total blindness) to those who have a sight loss which is uncorrectable by aids such as glasses. Some people will be affected by a sight problem from birth, whilst others may inherit an eye condition which deteriorates over time, such as retinitis pigmentosa. People may lose their sight as the result of an accident, or, alternatively, illness can lead to conditions such as diabetic retinopathy.

#### **Levels of hearing impairment**

- profoundly deaf
- a slight hearing impairment
- one or both ears may be affected

A person may have had a hearing impairment since birth or early childhood or, alternatively, you may have developed your hearing impairment more recently. A person may communicate using sign language, by lipreading, or you may use hearing aids. They might consider themselves as part of the Deaf community, as partially deaf, as partially hearing or not label themselves at all.

**'Mobility impairment'** and 'physical impairment' are terms used to describe a vast range of physical difficulties an individual may experience. For example, your impairment may affect your whole body or part of it. You may need to use mobility equipment, such as a wheelchair or crutches, to help you get around.

The impact of the impairment may vary depending on the tasks that are being undertaken and may vary depending on how a person is feeling on a particular day. For example, the person may require the support of others to enable them to carry out daily tasks, or they may need to consider issues around accessibility, distance, and the physical tasks involved when making day-to-day decisions.
