COVID-19 Update for Universities for the 2021-2022 Application Cycle

The 2020-2021 school year was in-person at the American School of Warsaw. In person schooling was possible due to strict protocols including weekly or twice weekly COVID testing on campus. It should be noted, however, that a small percentage of students needed/selected the hybrid model of learning (not offered in the 2021-2022 school year) which allowed students virtual access to courses for extended periods of time. The only time ASW was in virtual school mode was between March 2020 and June 2020. Everyone was able to participate in virtual school during that period.

ASW will continue to offer in-school teaching and learning as long as possible, until our safety protocols or the government indicates otherwise, at which time we would switch to full virtual learning.

In regards to standardized testing, SAT/ACT options have been very limited due to fewer test dates abroad. Although the SAT is offered on site this fall, the ACT is offered in a city 4 hours away from ASW, forcing students to take 1-2 days off of school to sit the exam. The counselors at ASW have encouraged students *not* to sit exams if test scores are optional at the universities to which they will apply.
